190G W/230G W 19 960–24 140-kg (44,000–53,220 lb.) Operating Weight

The wheel deal.

Looking to get on a roll? 190G W and 230G W Wheeled Excavators travel on tires, so they're more mobile and maneuverable than tracked excavators. Their more spacious and comfortable cabs come equipped with easy-to-navigate enhanced LCD monitors that let operators easily dial-in a wealth of machine info and functionality. Rugged EPA Interim Tier 4 (IT4)/EU Stage IIIB diesels meet rigid emission regulations, enabling you to work, wherever there's work. Delivering the smoothness, control, and operating ease you've come to expect from John Deere, these wheeled excavators are the real deal.

DEERE

*With two-piece boom and front and rear outriggers.

John Deere WorkSight[™] is an exclusive suite of telematic solutions that increases uptime while lowering operating costs. At its heart, JDLink[™] Ultimate machine monitoring provides real-time utilization data and alerts to help you maximize productivity and efficiency while minimizing downtime. Remote diagnostics enable your dealer to read codes, record performance data, and even update software without a trip to the jobsite.

Choose from a variety of boom, blade, outrigger, and bucket options to equip your machine exactly as needed to optimize your setup.

ture comforts.

The IT4/Stage IIIB technology utilized in our diesel engine is simple, fuel efficient, fully integrated, and fully supported. Seamless solutions that require no operator input or loss of productivity include field-proven cooled exhaust gas recirculation (EGR) for reducing NO_x, and a diesel particulate filter (DPF) and diesel oxidation catalyst (DOC) to reduce particulate matter.

Spacious cab delivers excellent visibility and less noise, along with a bevy of crea-

Rubber tires allow you to drive quickly from job to job instead of loading up a trailer — plus they're much friendlier to paved surfaces.

The G-Series' short wheelbase makes them very adept in close quarters - unlike unwieldy truck-mounted excavators. For work close-up, opt for the two-piece boom.

Multi-language LCD monitor and rotary dial provide intuitive access to a wealth of information and functions.

Streetwise.

Work has never been easier than with John Deere wheeled excavators. They're the perfect "Swiss Army knife" for a variety of work, whether it's clearing ditches, repairing sewers or potholes, loading trucks, or moving Jersey barriers. Rubber tires and transport speeds as fast as 35 km/h (21.7 mph) mean you don't need to load them on a trailer to travel to a nearby job or across pavement. Plenty of street smarts, too, with the Powerwise III™ engine/hydraulic-management system, three productivity modes, and Power Dig and Auto Power Lift functions. Add any of the many available options to tackle a wide variety of on- and off-road work.

When the digging gets tough, press the Power Dig button for the extra hydraulic power you need to muscle through. Need a little extra lift when craning? Auto Power Lift automatically engages when the boom is raised.

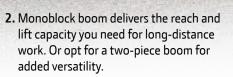

Powerwise III perfectly balances engine performance and hydraulic flow for predictable operation. Three productivity modes allow you to choose the digging style that fits the job. *High productivity* delivers more power and faster hydraulic response to move more material. *Power* delivers smooth and balanced metering for normal operation. *Economy* reduces top speed and helps save fuel. Impressive horsepower, weight, and dig forces make these machines highly productive for a wide variety of work.

Activate the axle-lock switch on the steering column to hold the machine more steady while digging or handling material when the stabilizers are not in use. Engage the brake at the same time to add even more stability.

Fast travel speed and boom and arm movement combined with superior arm force help speed cycle times. Wide axles, rock-solid stability, and substantial lift capabilities allow these machines to quickly move Jersey barriers. Low-flow assist hydraulics come standard, perfect for lower-pressure, lower-flow applications like bucket-tilt or -swinger attachments. Need additional hydraulic capability? Dealer-installed high-pressure, high-flow auxiliary hydraulic packages are available.

Standard deluxe lighting package provides 360-deg. illumination of the work area so you can extend the workday beyond daylight hours.

If you don't need a blade, choose the four-outrigger option for maximum stability. You can activate the outriggers together or independently to quickly and easily level the machine. 1. Refined parallelogram blade better handles backfill and cleanup duties, while serving as a third stabilizer during digging.

190G

5

3. Standard solid-rubber spacer between the heavy-duty dual tires puts pressure on the sidewalls to help keep the machine more stable. It also keeps mud and debris out, for longer tire life.

Tap into your full potential.

Operators will have no trouble "dialing it up a notch" in this spacious, well-appointed cab. The refined monitor employs a rotary control that operators can simply turn and tap to access an abundance of performance and convenience functions and features. Operators will also appreciate the comfortable fabric-covered high-back seat, unsurpassed all-round visibility, low-effort joysticks, a highly efficient HVAC system, and numerous other amenities. The 190G W and 230G W provide everything your operators need to do their best work.

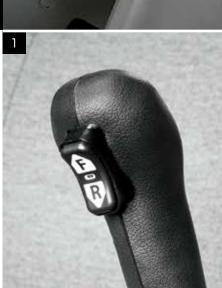

Generous hydraulic flow and smooth, predictable metering ensure powerful digging force, precise low-effort control, and superb multifunction operation. Quick, responsive pump activation eliminates any delay in functions.

Wide expanse of front and side glass, narrow front cab posts, large overhead glass, and numerous mirrors provide virtually unobstructed all-around visibility. If you need to see more, the standard rearview camera displays the action behind on the monitor.

We've got your back with a sculpted mechanical-suspension high-back seat. Seat has 318 mm (12.5 in.) of travel, sliding together or independent of the joystick console. So it won't cramp an operator's style. Two-speed PowerShift[™] transmission shifts smoothly on-the-go from low to high in each speed, enabling multiple operating speeds for better responsiveness. Downshifting isn't a problem either, since the transmission will only shift within certain travelspeed parameters — protecting both operator and drivetrain.

Multi-language LCD monitor provides intuitive access to a wealth of information and functions. Simply turn and tap the rotary dial to select work mode, access operating info, check maintenance intervals, source diagnostic codes, adjust cab temperature, and tune the radio. Plus much more.

- The F-N-R directional switch is now conveniently located on the left-hand pilot lever, making it is easier to control the blade and stabilizer functions.
- 2. Ergonomically correct short-throw pilot levers provide smooth, predictable fingertip control with less movement or effort. Push buttons in the right lever allow fingertip control of auxiliary hydraulic flow for operating attachments.
- 3. Each outrigger is independently controlled, enabling optimum placement to help complete the job safely and surely.
- Automatic, high-velocity bi-level climate-control system with automotive-style adjustable louvers helps keep the glass clear and the cab comfortable.

A John Deere exclusive, three welded bulkheads within the boom resist torsional stress for unsurpassed durability. Booms, arms, and mainframes are so tough, they're warranted for three years or 10,000 hours.

Highly efficient, heavy-duty cooling system keeps things cool, even in the toughest environments.

230G

10

Nothing runs like a Deere, because nothing is built like one.

Don't let downtime get you down. From their ultra-dependable, fuel-sipping diesels to their rugged D-channel side frames, these wheeled excavators keep things upbeat — and up and running. Their highly efficient cooling system ensures things are running cool in any environment. You'll also continue to profit from traditional durability-enhancing features, including tungsten-carbide thermal-coated arm surfaces, oil-impregnated bushings, and welded boom bulkheads. For maximum uptime and long-term durability. When you know how they're built, you'll run a Deere.

 Heavy-duty covers on the oversize outriggers help prevent damage to the hydraulic cylinders.

DEERE

 Large chassis beams, swing bearings, and boom-foot areas deliver rocksolid durability.

Oil-impregnated bushings enhance durability and extend grease intervals to 500 hours for the arm-and-boom joint and 100 hours for the bucket joint.

PowerShift transmission has been integrated with the axle and repositioned higher above ground level to better protect it from damage.

Wet-type disc brakes are virtually maintenance free and deliver reliable, long-term stopping power.

3. Tungsten-carbide coating creates an extremely wear-resistant surface to protect the all-important bucketto-arm joint.

Let's roll.

G-Series Wheeled Excavators are loaded with features that make them hassle-free to service and maintain, so you can keep things rolling. Large, easy-to-open doors and easy-access service points make quick work of the daily routine. Remote-mounted vertical oil and fuel filters minimize maintenance. And extended engine and hydraulic fluidservice intervals increase uptime and reduce daily operating costs. Plus the Machine Information Center (MIC), state-of-the-art LCD color monitor, and fluid-sample ports help you make timely decisions about machine upkeep — and manage uptime and costs.

Auto-idle automatically reduces engine speed when hydraulics aren't in use. Auto-shutdown further preserves precious fuel.

MIC captures and stores vital machine performance and utilization data to help improve uptime.

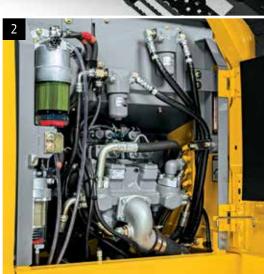

Large fuel tanks and 500- and 5,000hour engine and hydraulic oil-service intervals decrease downtime for routine maintenance.

Ground-level fresh-air cab filter is quickly serviced from outside the cab where it's more likely to get done.

Reinforced resin thrust plates, grooved bushings, and thermal-coated bucket joints increase arm, boom, and bucket lube intervals to 500 hours. Ultimate Uptime, featuring John Deere WorkSight, is a customizable support solution available exclusively from your Deere dealer. This flexible offering maximizes equipment availability with standard John Deere WorkSight capabilities that can help prevent future downtime and speed repairs when needed. In addition to the base John Deere WorkSight features, our dealers work with you to build an uptime package that meets the specific needs of your machine, fleet, project, and business, including customized maintenance and repair agreements, onsite parts availability, extended warranties, fluid sampling, responsetime guarantees, and more.

- 1. Easy-to-read LCD monitor tracks scheduled maintenance intervals and issues reminders. Should a problem arise, it provides diagnostic information to help decrease downtime.
- 2. Swing open the side panels on either side of the machine to provide even more wide-open access to components.
- **3.** Fuel coolers and A/C condensers swing out, simplifying clean-out. Side-by-side coolers provide easy access.
- 4. Vertical spin-on engine oil filters and fuel/water separators are conveniently grouped in the right rear compartment, for easy ground-level servicing.

Lift Capacities (continued) 190G W

Boldface type indicates hydraulically limited capacities; lightface type indicates stability-limited capacities, in kg (lb.). Ratings at bucket lift hook; machine equipped with 600-kg (1,323 lb.) bucket, 2.71-m (8 ft. 11 in.) arm, and standard counterweight; and situated on firm, level, uniform supporting surface. Figures do not exceed 87% of hydraulic capacity or 75% of weight needed to tip machine.

Buckets

190G W

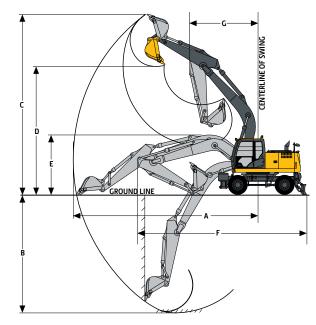

A full line of buckets is offered to meet a wide variety of applications. Digging forces are with power boost. Buckets are equipped with John Deere TK-Series Bucket Teeth standard. Replaceable cutting edges and a variety of teeth are available through John Deere Parts. Optional side cutters add 150 mm (6 in.) to bucket widths. Capacities are SAE heaped ratings.

Engine	230G W		
Manufacturer and Model	Isuzu 4HK1		
Non-Road Emission Standard	EPA Interim Tier 4/EU Stage III	В	
Cylinders	4		
Displacement	5.2 L (317 cu. in.)		
Net Peak Power (ISO 9249)	119 kW (159 hp) at 2,000 rpm		
Off-Level Capacity	60% (31 deg.)		
Aspiration	Turbocharged, air-to-air charg	e-air cooler	
Cooling	la bochargea, an to an charg		
High-efficiency, direct-drive suction-	type fan		
Powertrain			
2-speed propel with creeper mode a	ad automatic shift		
Maximum Travel Speed			
-	2.9 km/h (1.8 mph)		
Creeper			
Low	7.4 km/h (4.6 mph)		
High	27.5 km/h (17.1 mph)	h dha Bhall ta an saattaa	
Front Axle	All-wheel drive; can be locked	nyoraulically in any position	
Oscillation	±6 deg.		
Brakes		akes on front and rear axles; fully hydrau	ulic service brakes
Tires	Standard size, dual-traction-ty	/pe 11.00-20 16PR tires	
Drawbar Pull	11 115 kgf (24,504 lbf)		
Hydraulics			
Main Pumps	2 variable-displacement axial-	piston pumps	
Pump Flow, Maximum x 2	189 L/min. (49.9 gpm)		
System Operating Pressure			
Implement Circuits	34 300 kPa (4,975 psi)		
Travel Circuits	35 300 kPa (5,120 psi)		
Swing Circuits	30 200 kPa (4,380 psi)		
Power Boost	38 000 kPa (5,511 psi)		
Controls	Pilot levers, short stroke, low-	effort hydraulic pilot controls with shut	off lever
Cylinders			
	Bore	Rod Diameter	Stroke
Monoblock Boom (2)	125 mm (4.9 in.)	85 mm (3.4 in.)	1241 mm (48.9 in.)
2-Piece Boom (2)	130 mm (5.1 in.)	85 mm (3.4 in.)	1024 mm (40.3 in.)
Positioning, 2-Piece Boom (2)	180 mm (7.1 in.)	110 mm (4.3 in.)	680 mm (26.8 in.)
Arm (1)	135 mm (5.3 in.)	95 mm (3.7 in.)	1475 mm (58.1 in.)
Bucket (1)	115 mm (4.5 in.)	80 mm (3.2 in.)	1060 mm (41.7 in.)
Electrical			
Voltage	24 volt		
Number of Batteries (12 volt)	2		
Alternator Rating	50 amp		
Lights (6)	Headlights (2), top of cab (2),	rear of cab (1) and boom (1)	
Driving Lights		d hazard lights, brake lights, and side m	arker lights
Swing Mechanism			
	11.2 rpm		
Speed			
Torque	61 500 Nm (45,360 lbft.)		
Serviceability			
Refill Capacities			
Fuel Tank	400 L (105.7 gal.)		
Engine Coolant	25 L (6.6 gal.)		
Engine Oil with Filter	23 L (6.1 gal.)		
Hydraulic Tank	130 L (34.3 gal.)		
Hydraulic System	270 L (71.3 gal.)		
Swing Drive	6.2 L (6.6 qt.)		
Transmission	2.5 L (2.6 qt.)		

Serviceability (continued)	230G W	
Refill Capacities (continued)		
Differential Gear		
Front	11 L (2.9 gal.)	
Rear	14.5 L (3.8 gal.)	
Front and Rear Hubs	2.5 L x 2 (2.6 qt. x 2)	
Operating Weights		
With full fuel tank; 79-kg (175 lb.) opera and 4500-kg (9,921 lb.) counterweight	tor; 0.8-m³ (1.04 cu. yd.), 900-	mm (35 in.), 660-kg (1,455 lb.) general-purpose bucket; 2.91-m (9 ft. 7 in.) arm; standard gauge;
	Monoblock Boom	2-Piece Boom
Front Outrigger and Rear Outrigger	23 600 kg (52,030 lb.)	24 140 kg (53,220 lb.)
Front Blade and Rear Outrigger	23 290 kg (51,350 lb.)	23 830 kg (52,540 lb.)
Operating Dimensions		
	Monoblock Boom	2-Piece Boom
Arm Digging Force		
SAE	110 kN (24,729 lb.)	110 kN (24,729 lb.)
ISO	114 kN (25,628 lb.)	114 kN (25,628 lb.)
Bucket Digging Force		
SAE	141 kN (31,698 lb.)	141 kN (31,698 lb.)
ISO	158 kN (35,520 lb.)	158 kN (35,520 lb.)
A Maximum Reach	10.28 m (33 ft. 9 in.)	10.03 m (32 ft. 11 in.)
B Maximum Digging Depth	6.31 m (20 ft. 8 in.)	6.14 m (20 ft. 2 in.)
C Maximum Cutting Height	10.25 m (33 ft. 7 in.)	10.36 m (34 ft. 0 in.)
D Maximum Dumping Height	7.38 m (24 ft. 3 in.)	7.43 m (24 ft. 5 in.)
E Overall Height	3.19 m (10 ft. 6 in.)	3.32 m (10 ft. 11 in.)
F Overall Length		
Front Outrigger and Rear Outrigger	9.96 m (32 ft. 8 in.)	9.64 m (31 ft. 7 in.)
Front Blade and Rear Outrigger	9.96 m (32 ft. 8 in.)	9.64 m (31 ft. 7 in.)
G Minimum Swing Radius	3.55 m (11 ft. 8 in.)	3.42 m (11 ft. 3 in.)

n

 Lift Capacities
 230G W

 Boldface type indicates hydraulically limited capacities; lightface type indicates stability-limited capacities, in kg (lb.). Ratings at bucket lift hook; machine equipped with 666-kg (1,468 lb.) bucket, 2.91-m (9 ft. 7 in.) arm, and standard counterweight; and situated on firm, level, uniform supporting surface. Figures do not exceed 87% of hydraulic capacity or 75% of weight needed to tip machine.

Buckets

230G W

A full line of buckets is offered to meet a wide variety of applications. Digging forces are with power boost. Buckets are equipped with John Deere TK-Series Bucket Teeth standard. Replaceable cutting edges and a variety of teeth are available through John Deere Parts. Optional side cutters add 150 mm (6 in.) to bucket widths. Capacities are SAE heaped ratings.
