MWR SERIES

URBAN MACHINE HUMAN ENGINE

“For the past 60 years, innovation, accuracy and the search for performance have been the leading keywords of our company’s vision. At Mecalac, we imagine the machines designed for the construction sites of the 21st century. Since every job has its own characteristics and restrictions, since each country has its own culture, we build machines that respond perfectly to today’s challenges. Our machines are created by men, for men! We are proud to be human innovators who improve and push back the limits of our clients’ objectives.”

Henri Marchetta, Chairman
Groupe Mecalac S.A.S.

MWR 7·9·11

THE BEST OF 2 WORLDS

LOWERING THE CENTER OF GRAVITY, SIMPLY REVOLUTIONARY!

The fusion of the advantages of wheeled and crawler excavators brought about a unique Mecalac solution, conjugating mobility, versatility, stability, accessibility, driving user friendliness, lifting power and profitability. This is MWR series.

FROM GENESIS TO SOLUTION

DESIGN: A STRONG AND STRATEGIC COMPONENT OF THE MECALAC IDENTITY

"Our strength? Offering each client the most efficient solution. A deep analysis of users' work process allows us to provide the right industrial and versatile answer to their requests. This approach allows to offer better fitted machines based on the real needs of the jobsite. At Mecalac, design has always been part of our creation process. It is a strong and strategic component of our brand identity and products and is not limited to mere aesthetics. Our design is functional and secure. It blends ergonomics with smooth flowing lines".

Patrick Brehmer,
Head of Marketing,
Product Management & Design

AN EXCLUSIVE CONCEPT, A UNIQUE SOLUTION

By lowering the center of gravity of the new MWR relative to its competitors, Mecalac revolutionizes by 100% the world of wheeled excavators.

Consequences on all 'levels': from stability to accessibility, by way of security and 'all terrain' mobility, the machine gains in balance and in force without dropping any of its initial qualities.

More than a machine, the MWR is the achievement of a new concept and the result of a combined expertise of Mecalac for both wheeled and crawler excavators.

Its design has been developed to answer very demanding and complex specifications which Mecalac managed to implement in one single and unique machine.

The result: a machine with XS proportions and with XL lifting power, versatile and ultra-stable.

Moreover, the 9MWR benefits from the latest interior and exterior patented Mecalac technologies (articulated boom with offset, cylinder coupling, Connect quick coupler, central command selector, 'speed control' function).

AWARD 2016

Mecalac wins the Prize for Design of the 2016 Innovation AWARDs at the world exhibition BAUMA for the new concept of excavators on tyres: MWR.

WINNER OF THE bauma Innovation Award 2016

MWR 7.9.11

USER FRIENDLY

Optimize security for the operator as for the workers' team of both urban and suburban construction sites:

- maintenance feet on the ground
- oscillation locking by the brake pedal and the joystick
- reduced access height
- excellent compactness
- optional integrated and automated cameras
- excellent visibility

3 MODES

WATCH THE VIDEO

USER-FRIENDLY

DRIVING USER-FRIENDLINESS

PARKING, WORK OR ROAD MODE, IN ONE SINGLE SWITCH.

Thanks to the unique central selector, the driver can switch into road or parking mode in a single movement, thus sparing 7 to 10 manipulations. With this unique global exclusivity, everything can be done instantly by selecting the desired configuration.

With this unique, worldwide exclusive, everything can be done instantly by selecting the desired configuration. This guarantees faultless and ultra-safe driving on construction sites, leaving the driver free to calmly focus on the tasks at hand and take full control of the machine.

USER-FRIENDLY

CONNECT 'ATTACHED' TO VERSATILITY

IN ORDER TO MAKE ITS MACHINES EVER SAFER AND MORE VERSATILE, MECALAC INTRODUCES CONNECT, ITS PATENTED QUICK COUPLER, NOTABLE FOR ITS LIGHTNESS, INTEGRATION, USER-FRIENDLINESS, REVERSABILITY AND ITS PERFECT SAFETY.

Controlled from the cab, there is zero risk of it detaching from the tool either while it is being connected or while in operation. It is equipped with a detection system that alerts the driver if the tool is improperly secured (with visual and audible signals). Not only that, but it is also reversible and has an automatic play compensation function, making the CONNECT quick coupler the ultimate connection between tool and machine!

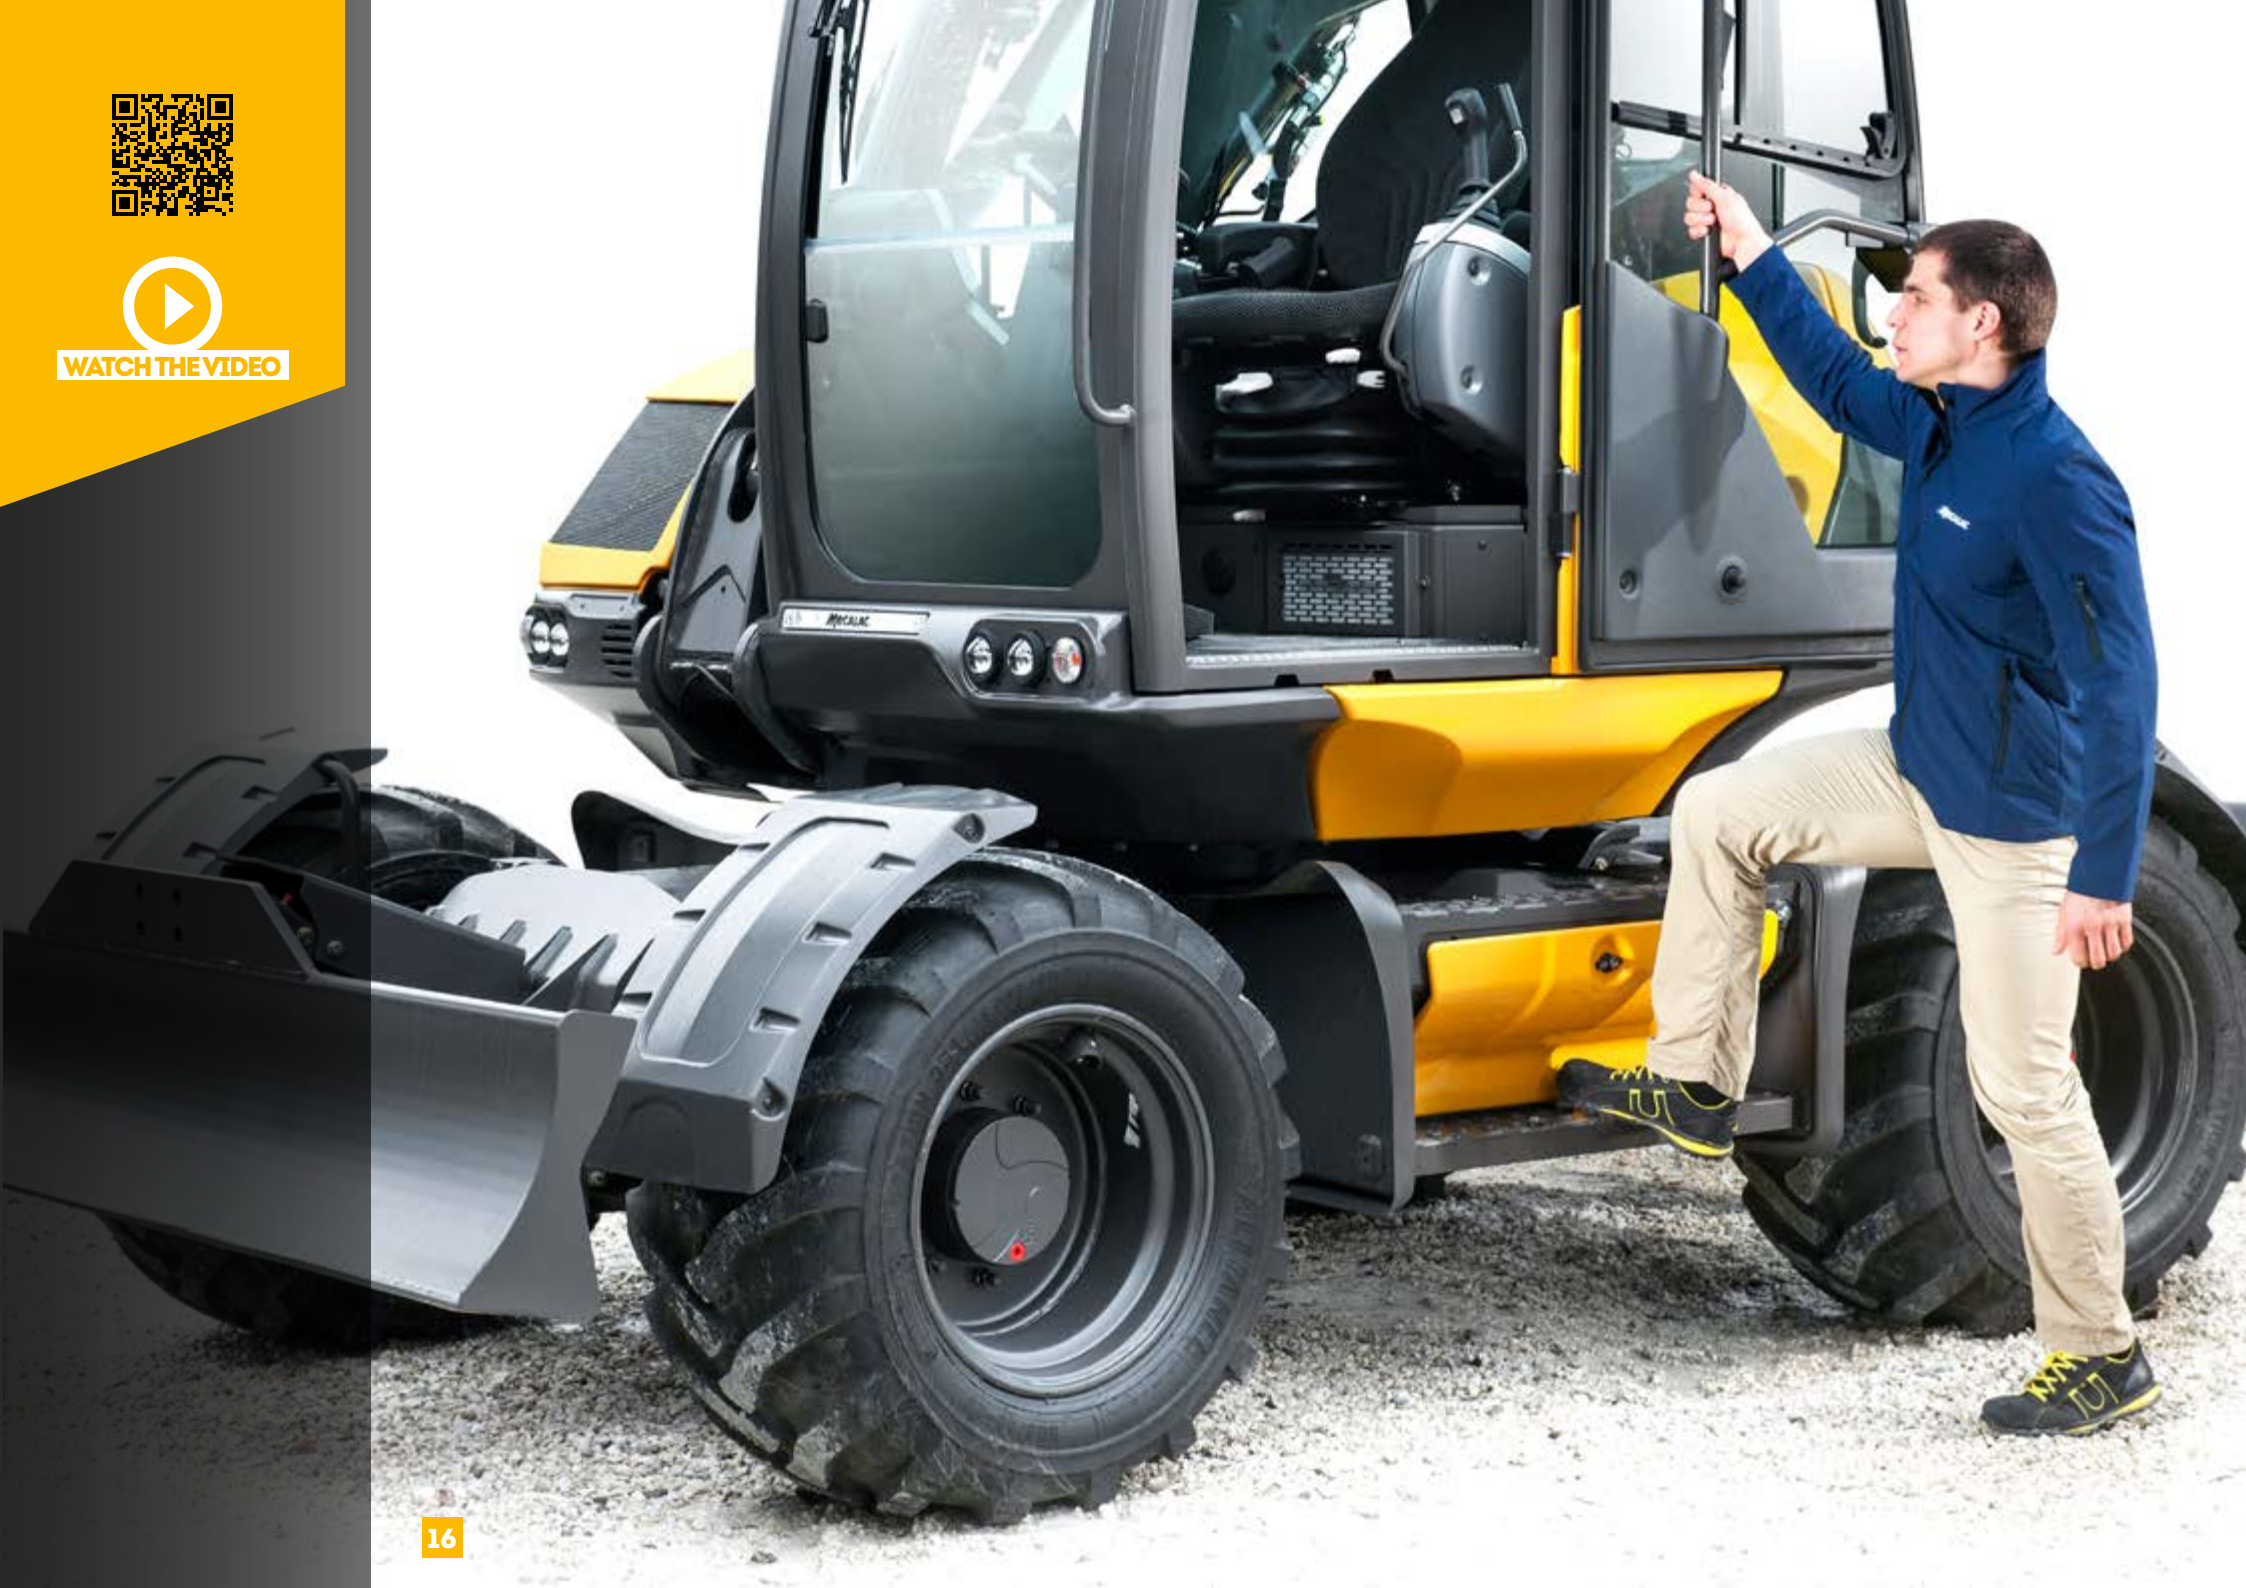
USER-FRIENDLY

THE QUEST FOR SIMPLICITY: DRIVING OUR RESEARCH

THE MWR REPRESENTS A NEW WAY TO INTERACT WITH CONSTRUCTION VEHICLES, THANKS TO ITS COMPLETELY REDESIGNED INTERNAL AND EXTERNAL ERGONOMICS AND UNIQUE INTERFACE BETWEEN HUMAN-MACHINE THAT COMBINES ACCESSIBILITY AND SAFETY.

Each and every driver action is simplified, affording greater protection of everybody on the worksite. When it comes to innovation, 'less is more' is definitely one of the keys to Mecalac's success.

WATCH THE VIDEO



USER-FRIENDLY

CLIMB UP AND DOWN EASILY

THANKS TO THE LOWERED CENTRE OF GRAVITY OF THE MACHINE, THE CABIN IS PERFECTLY ACCESSIBLE TO THE DRIVER, WITHOUT MAKING TOO MUCH EFFORT OR TAKING ANY RISKS.

The cab is 20% lower compared to rival products on the market so now entering and exiting the vehicle requires much less effort, and is further eased by the addition of a step that has been perfectly incorporated into the machine's design. One small step for man; one giant leap for worksite safety.

MECALAC
MECALAC

WATCH THE VIDEO

USER-FRIENDLY

FILL UP YOUR TANK EFFORTLESSLY

THE TANK IS EXTREMELY ACCESSIBLE AS IT IS LOCATED ON THE UNDERCARRIAGE AT A REACHABLE HEIGHT.

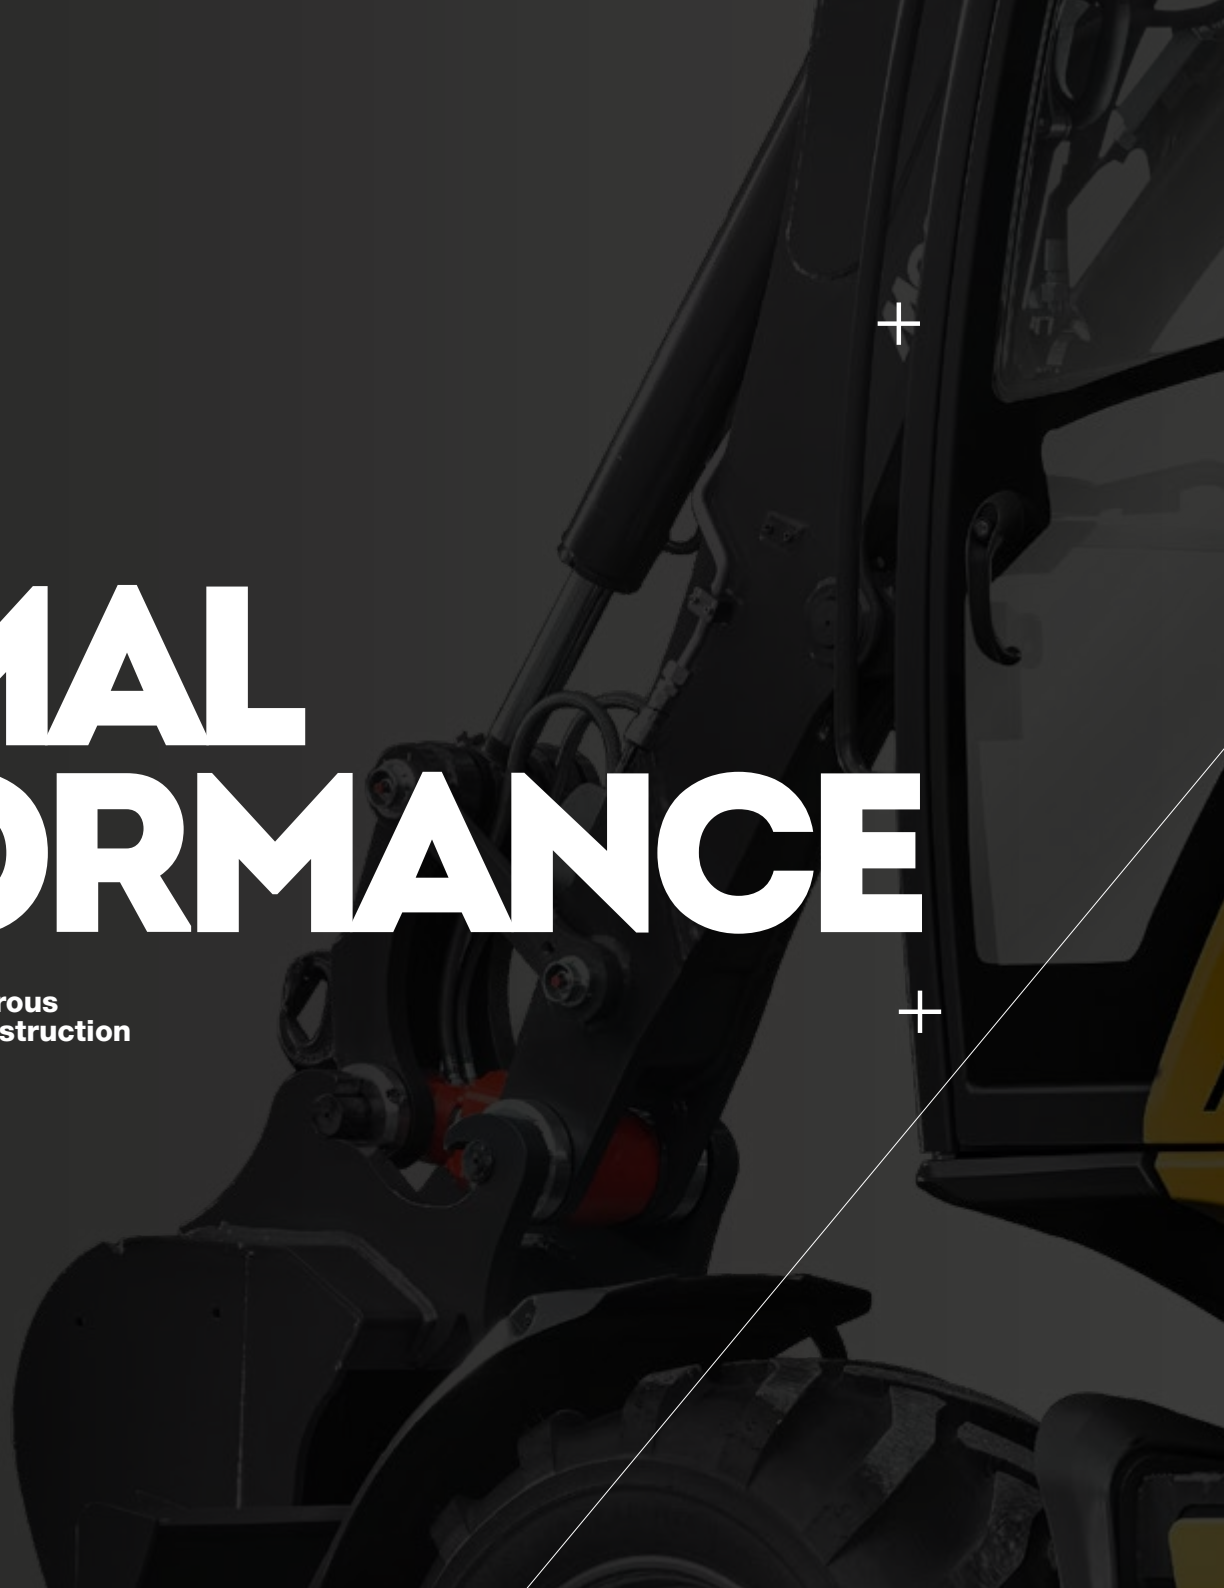
Besides helping lower the centre of gravity, the lower-down position of the tank and its increased capacity also mean that the driver or fleet manager no longer has to carry out any operations at height, nor is there anything in the way when driving the vehicle. With the majority of other excavators still mounting the fuel tank in the upper carriage, filling up an MWR is as simple as it is safe. Because daily upkeep should always be risk-free.

MWR 7·9·11

OPTIMAL PERFORMANCE

MWR machines are equipped with numerous technical characteristics for optimal construction site management on all types of terrain.

- naturally balanced
- all terrain capacity
- manœuverability
- agility
- compactness
- lifting power



MECALAC
MECALAC

PERFORMANCE

NATURALLY BALANCED

THE NEW MWRS BENEFIT FROM 360° ISO STABILITY: THIS MEANS THE MACHINE'S STABILITY REMAINS THE SAME REGARDLESS OF THE ROTATION ANGLE OF THE UPPER CARRIAGE.

Lift, place, move, unload... all without moving. The new MWRs transform worksite logistics thanks to their incredible stability in any position and on any terrain. Whatever the conditions, they stay balanced both when travelling in transfer operations between sites as well as during work phases. This gives them 360° lifting performance - an extraordinary feat.

PERFORMANCE

GROUND CLEARANCE

THE LOWERED CENTER OF GRAVITY HAS ABSOLUTELY NO INCIDENCE ON THE GROUND CLEARANCE HEIGHT, WHICH IS AN EXCLUSIVE 'MADE IN MECALAC' PARADOX.

In order to guarantee the machine's mobility in spite of ground's unevenness, the machine keeps enough height to avoid rubbing and risks of tearing out the undercarriage.

MANŒUVERABILITY & COMPACTNESS

The new MWRs can be equipped with 4 steering wheels thus allowing you to do a U-turn practically on the spot and effectively overcome all obstacles. The aim: ensuring a maximum mobility in narrow spaces.

2.5 TIMES MORE COMPACT THAN A CLASSIC EXCAVATOR

AGILITY
Efficiency of movement

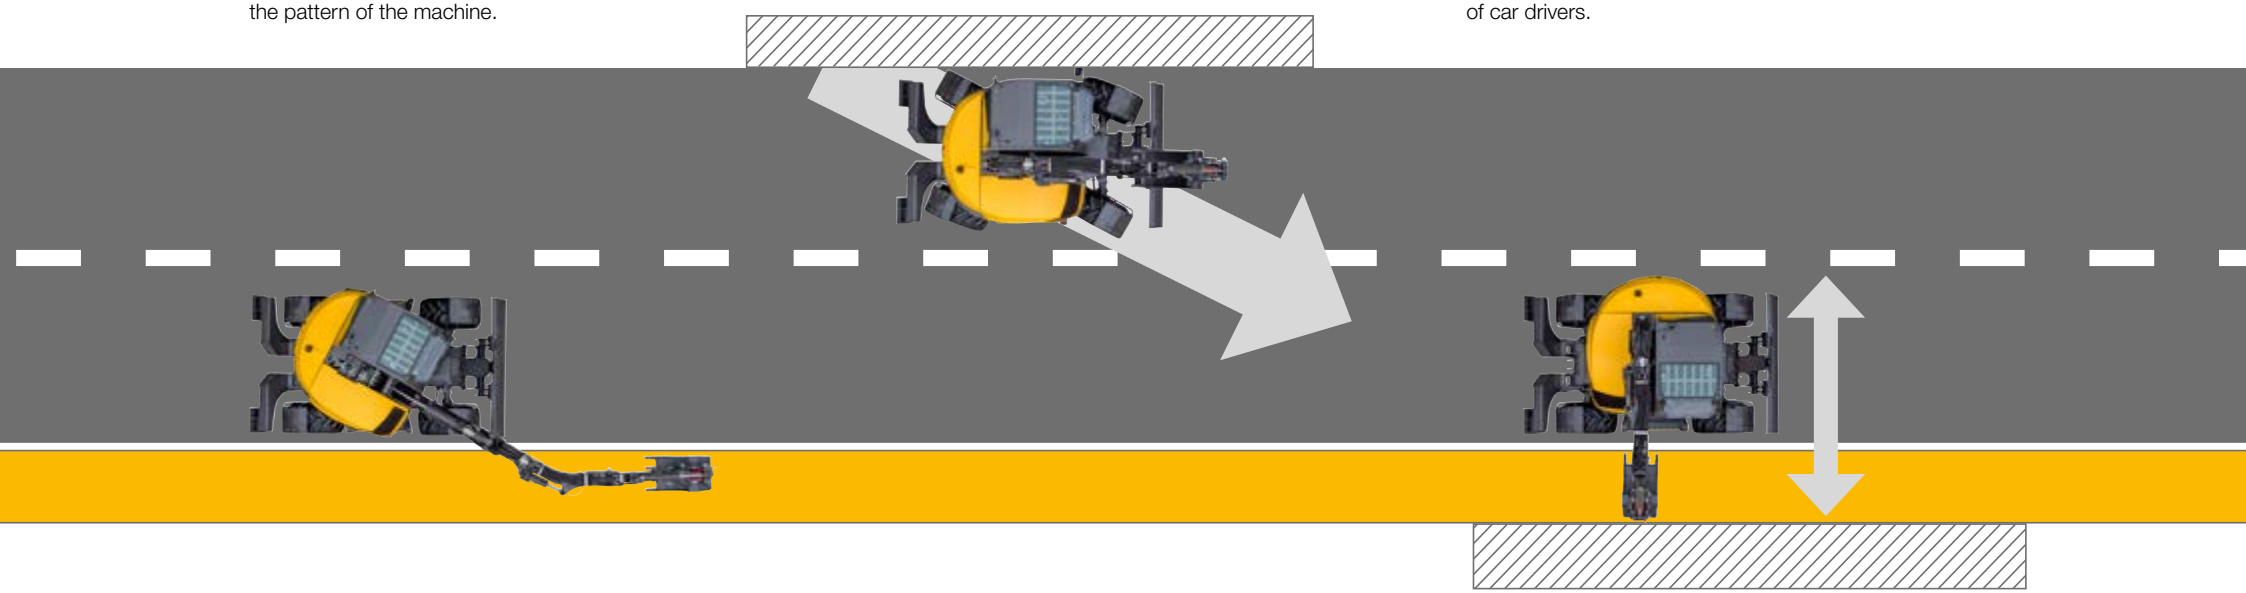
When the leeway is limited, the MWRs are a powerful ally. Their perfectly integrated and light offset and their 3-part arm allow them to work outside the pattern of the machine.

MOBILITY
Best manoeuvrability

The 3 direction modes enable the MWR to get out of any situation.

COMPACTNESS AT WORK
in the service of security

With their XS dimensions, their 360° rotation and their exceptional angular displacement of the boom, the MWRs only require one way in an urban area to carry out their missions, thus preserving the security of pedestrians and of car drivers.



MAXIMUM COMPACTNESS
for minimum bulk

This useful compactness frees 100% performances and 100% functions, therefore reducing the impact of urban construction sites on the environment.

PERFORMANCE

LIFTING POWER & AMPLITUDE

WATCH THE VIDEO

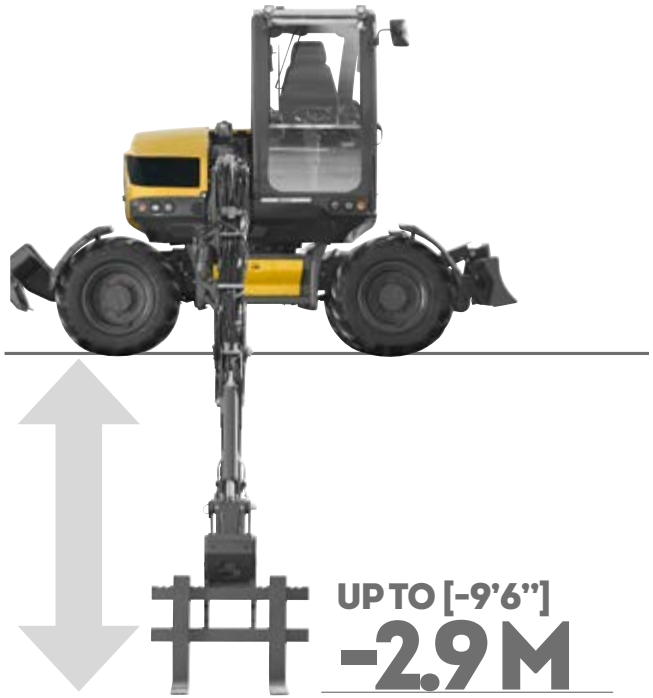
AN UNRIVALLED COMPACTNESS/LIFTING CAPACITY RATIO:

The unique architecture of the new MWRs makes these powerful and precise handling machines capable of lifting up to 3 tons to 3 m and 360°!

360°

AMPLITUDE

Equipped with a loader bucket or with pallet forks, the new MWRs allow for an unusual range of amplitude whether this is positive for loading a truck or negative for offloading pallets.



UP TO [-9'6"]
-2.9 M

PERFORMANCE

FROM VERSATILITY TO AUTONOMY

EXPERTISE IS BORN OF EXPERIENCE. OURS IS BASED ON THE STRONG CONCEPT THAT PROFITABILITY CANNOT BE CONSIDERED WITHOUT SIMPLICITY OF USE, COUPLED WITH VERSATILITY IN FUNCTIONS.

No matter the job, the country or the corporate culture, we offer the best visibility, manoeuvrability and freedom on each constuction site for optimal autonomy.

LARGE DIGGING AMPLITUDE

SET UP YOUR MWR

The new MWR comes standard equipped with a number of features, while at the same time remaining attentive to the specifications required by various types of customers: landscape and earthwork contractors, public works' professionals, municipal authorities, etc. So, from the color scheme to the choice of tires, heating/AC or cameras, not to mention the various attachments, buckets and hydraulic tools which can be used, there are many different ways to tailor your new MWR to your brand and business.

CUSTOM COLORS

You wish to get your MWR with your brand colors ?
Customize your Mecalac with your own RAL color codes.

TIRES CHOICES

7MWR-9MWR

Simple Alliance 365/70 R18 EM (standard)
Large Alliance 500/45 R20
Twin BKT 8.25-20 (with spacer)

11MWR

Simple Alliance 18-19.5 (standard)
Large Alliance 600/40 R22.5
Twin BKT 9.00-20 (with spacer)

TECHNOLOGIE

MyMecalac Connected Services (Telematics)

Standard and optional equipment may vary.
Consult your Mecalac dealer for details.

CAB - COMFORT AND SAFETY

- Air conditionning (increases cab height)
- Rotating beacon
- LED rotating beacon
- Travel alarm
- White noise type adaptative travel alarm
- Overload buzzer (additional to screen indicator)
- Additional front working light
- Rear working light, LED
- Stereo USB Bluetooth radio
- Heated pneumatic seat
- Rear cam (in addition to the side cam)
- Pattern changer ISO / SAE
- Rain protector
- Cabin sun visor (standard)
- 12V Plug
- Preparation for installation of a fleet management system

FRAME

- 4 steering wheels 30 km/h (7MWR and 11MWR)
- 2 steering wheels 35km/h (9MWR)
- 2 steering wheels 30km/h (11MWR)
- 4 steering wheels 20km/h (9MWR and 11MWR)
- 4 steering wheels 35km/h (9MWR)
- Steering direction inversion (4 steering wheels only)
- Mudguards (4 steering wheels only)
- Front blade and stabilisers
- Blade rear (standard)
- Rubber protective pads under stabilisers
- Clamshell grab support
- Additional counterweight
- Blade preparation for trailer hook

ENGINE

- Diesel Particulate Filter (DPF) (standard in Europe)
- Automatic engine idle shutdown
- Electric diesel refueling pump with automatic stop
- Anti-theft device - electronic immobilizer with 6 keys

AUXILIARY LINES

- Additional proportional auxiliary line (diverted offset cylinder for rotating function of a clamshell)
- Additional auxiliary line (diverted bucket cylinder for opening / closing function of a clamshell)
- Hammer return line

ANTIDROP SAFETY VALVES

- Safety valves on boom, adjustable boom, dipperstick (standard)
- Safety valves on boom, adjustable boom, dipperstick, bucket

QUICK COUPLER

- Mecalac CONNECT hydraulic quick coupler - with hook
- Device for the Direct Coupling of tools on dipperstick (“pin-on”) with pins, in-cab switch and hydraulic lines for quick couplers

LUBRICATION

- Standard manual greasing: single point for turret and first boom (standard)
- Centralized, manual lubrication turret, boom and stick (except axles between connecting rod and quick coupling system)
- Centralized, automatic lubrication for turret, boom and stick (except axles between connecting rod and quick coupling system)

OIL CHOICES

- Hydraulic oil (VG 46) (standard)
- Hydraulic oil Syn Panolin (HLP 46)
- Hydraulic organic oil Panolin (HLP 46)
- Hydraulic oil for cold weather (ISO 32)
- Hydraulic oil for hot weather (ISO 68)
- Hydraulic oil for very hot weather (ISO 100)

Mecalac variable kinematics consisting of 4 parts: boom, intermediate boom, offset and dipperstick	•	•	•
Right and left offset by hydraulic cylinder. System enabling all penetration force to be kept regardless of the angular position of the offset	•	•	•
Left offset	**1382 mm** (54 in)	**1551 mm** (61 in)	**1775 mm** (70 in)
Right offset	**1820 mm** (72 in)	**1899 mm** (75 in)	**2034 mm** (80 in)
Boom cylinder with endof travel shock absorber	•	•	•
Stick length	**1650 mm** (5'5")	**1800 mm** (5'11")	**2025 mm** (6'7")
CONNECT quick coupler - Take up with automatic mechanical locking - Detection of incorrect locking - Hydraulically-controlled unlocking	•	•	•

OPERATING MODES

WORKING MODE
- Turret rotation and dipperstick control with the left control lever
- Bucket and intermediate boom or boom control with the right control lever
- Travelling control using foot pedals

DRIVING MODE
- Deactivation of the manual engine speed control. The engine speed varies depending on how far the travel pedal is depressed
- Turning on road headlights
- Turning on rotating beacon
- Locking of machine hydraulic functions (attachment, slewing, outriggers)
- Deactivation of oscillation lock (only if oscillation lock selector is on AUTO) and is not activated via the right joystick
- Deactivation of the travel alarm
- Deactivation of the overload alarm
- Display of speed in km/h
- Deactivation of idle function via keypad and joystick
- Speed controller
- Screen display in road mode

PARKING MODE
- Engages parking brake
- Turns the transmission into Neutral
- Deactivates the accelerator pedal
- Set engine rpm into idle
- Locks hydraulic and electrical controls
- Sets the screen display in economy mode
- Locks the oscillating axle
- Turns on road headlights

NOTE: METRIC MEASUREMENTS ARE THE CRITICAL VALUES
- 1 Litre = 0.26417 US Liquid Gallons
- 1 Litre = 0.21997 Imperial Liquid Gallons

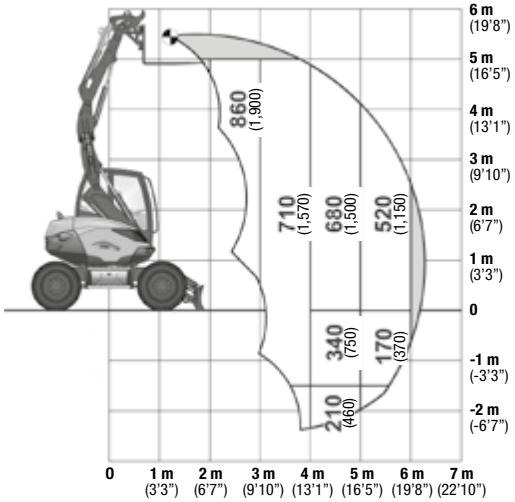
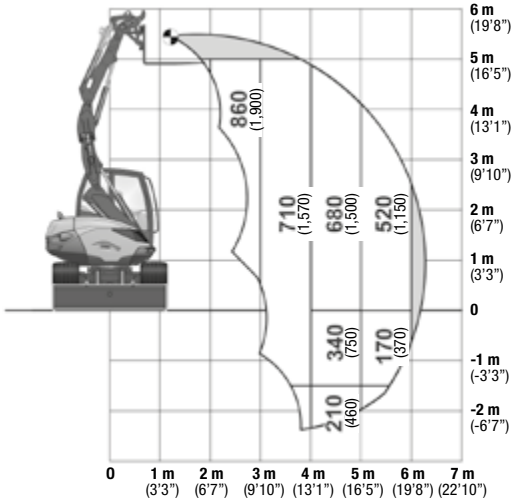
7MWR - HANDLING
MECALAC VERSATILE BOOM*

LIFTING CAPACITIES WITH PALLET FORKS

All the weights are given in kg (lb) with CONNECT.





WORKING CONDITIONS
- On wheels, blade on the ground
- On horizontal, compact ground
- Boom and stick used without offset
- Oscillation axle blocked
- Equiped with pallet fork
- Equiped with 4 safety valves

ACCORDING TO ISO 10567
- Maximal 75% of the tipping load or 87% of the hydraulic capacity
- **Maximum values determined for the most unfavorable position of boom and cylinders**

* with offset

LIFTING CAPACITIES WITH LOADING HOOK – BLADE ON GROUND

Working in longitudinal position on blade side

Working over the side or at 360°

WORKING CONDITIONS
- On wheels, blade on the ground or raised
- On horizontal, compact ground
- Boom and stick used without offset
- Front and rear frame aligned
- Without tools (bucket, shovel…) with handling plate and loading hook of 3 t (6,613 lb)
- Maximal 75% of the tipping load or 87% of the hydraulic capacity
- **Maximum values determined for optimal position of boom and cylinders**

The lifting capabilities shown with an asterisk (*) are limited by the tipping load that can be lifted. Other values are limited by the hydraulic capabilities or capability of the loading hook. The weight of the chain sling, bucket and other auxiliary lifting devices must be deducted from the nominal load to determine the load which can be lifted.

Working in longitudinal position on blade side

Working over the side or at 360°

WORKING CONDITIONS
- On wheels, blade and stabilisers on ground or raised
- On horizontal, compact ground
- Boom and stick used without offset
- Front and rear frame aligned
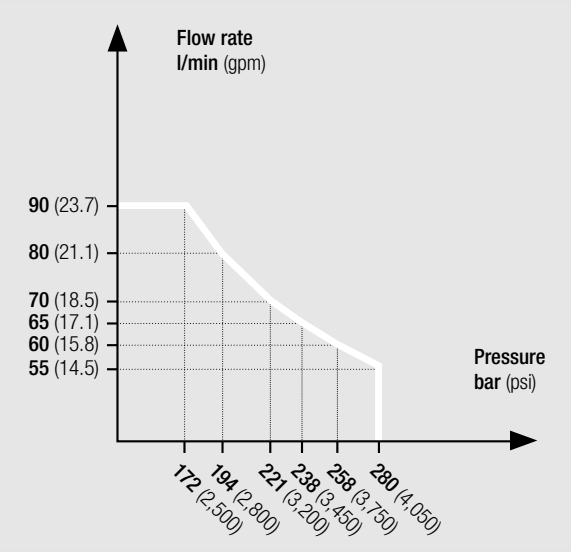
- Without tools (bucket, shovel,...) with handling plate and loading hook of 4 t (8,818lb)
- Maximal 75% of the tipping load or 87% of the hydraulic capacity
- **Maximum values determined for optimal position of boom and cylinders**

The lifting capabilities shown with an asterisk (*) are limited by the tipping load that can be lifted. Other values are limited by the hydraulic capabilities or capability of the loading hook. The weight of the chain sling, bucket and other auxiliary lifting devices must be deducted from the nominal load to determine the load which can be lifted.

NOTE
METRIC MEASUREMENTS ARE THE CRITICAL VALUES
- 1 Litre = 0.26417 US Liquid Gallons
- 1 Litre = 0.21997 Imperial Liquid Gallons

7MWR

FLOW RATE / PRESSURE AUXILIARY 1 (PROPORTIONAL)

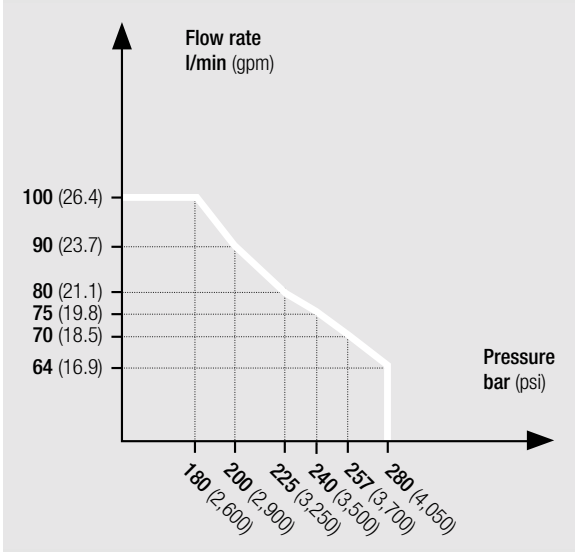


AUXILIARY LINE 2	DATA
Offset cylinder diverted (clamshell rotation)	
Flow rate maximum	**30 l/min** (7.9 gpm)
Pressure	**280 bar** (4,050 psi)
Controls	Proportional as option

AUXILIARY LINE 3	DATA
Bucket cylinder diverted (clamshell function)	
Flow rate maximum	**80 l/min** (21.1 gpm)
Pressure maximum	**280 bar** (4,050 psi)

9MWR

FLOW RATE / PRESSURE AUXILIARY 1 (PROPORTIONAL)

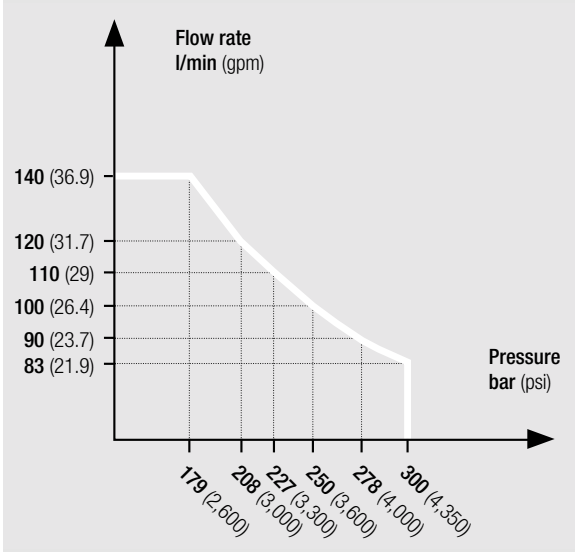


AUXILIARY LINE 2	DATA
Offset cylinder diverted (clamshell rotation)	
Flow rate maximum	**30 l/min** (7.9 gpm)
Pressure	**280 bar** (4,050 psi)
Controls	Proportional as option

AUXILIARY LINE 3	DATA
Bucket cylinder diverted (clamshell function)	
Flow rate maximum	**80 l/min** (21.1 gpm)
Pressure maximum	**280 bar** (4,050 psi)

11MWR

FLOW RATE / PRESSURE AUXILIARY 1 (PROPORTIONAL)



AUXILIARY LINE 2	DATA
Offset cylinder diverted (clamshell rotation)	
Flow ratemaximum	**30 l/min** (7.9 gpm)
Pressure	**300 bar** (4,350 psi)
Controls	Proportional as option

AUXILIARY LINE 3	DATA
Bucket cylinder diverted (clamshell function)	
Flow rate maximum	**120 l/min** (31.7 gpm)
Pressure maximum	**300 bar** (4,350 psi)
