

CH380

CH380 is a chipper for professional energy chipping (5000 - 40000 cubic meters of chips annually). Thanks to adjustable chip size bioenergy can be produced for small or for big heating systems. The max. diameter of the tree trunk to be fed into chipper is 380 mm.

-High operation revolution ensures a good output, homogeneous chips quality and excellent discharge power for this chipper.

-FARMI wood chipping with double disc in 3 steps:

Cutting knives - Extra knives - Twig/Gross breaker .

-CH380HF with roller feed of whole trees and tree trunks

-CH380HFC with s

Technical data	CH380 HFC	CH 380 HF
Output, m ³ /h	30-100	30-100
Max. timber / feed opening, mm	380 / 380x420	380 / 380x420
Thickness of chip, mm	10 - 30	10 - 30
Recommended power, kW	125-205	125-205
PTO revolution, rpm	(540) 750 (1000)	(540) 750 (1000)
Discharge chute standart (optional), m	4,1	4,1
Feeding by loader	Feeding conveyor	Feeding rollers
Chipper weight, kg	2300	2300
No-Stress	Standart	Standart
Hydraulic pump kit	Standart	Standart
Hydraulic discharge control	Standart	Standart
Function	Bioenergy / Landscaping/ maisemointi	Bioenergy / Landscaping
