

# 4-wheel Combinationsmachine - all-wheel steering KL100 / KL100CL

- flexible useable for short- and long cutted logs
- max. Clambank power
- maneuverable by all-wheel and "dog-like" steering
- powerful and high torque engine

### 4-wheel Combinationsmachine - all-whell steering KL100 / KL100CL

The KL100 - more Clambank is not possible As no other machine in the 4-wheel sector the KL100 combines logging of short and long logs. In so doing the all-wheel steering provides a unbelievable mobility. With the so called "Dog-like walking"-steering also difficult drive manoeuvers are possible.

The KL100 - not like all the others

"Not a must-do, but possible!"

### 4-wheel Combinationmashine - all-wheel steering **KL100 / KL100CL**

What makes the KL100 so unique? Besides the construction features like:

- hydraulic centre distance extension
- all-wheel steering
- Clambankpositioning on the rear axleForwarder bodie on a 4-wheel Skidder

above all the level of performance and traction

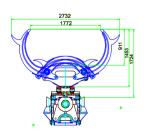

The KL100 - a machine for Professionals

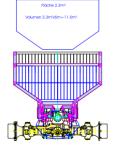

Not thinkable for a articulated skidder, but daily routine for a KL100 - the "dog-like"-steering

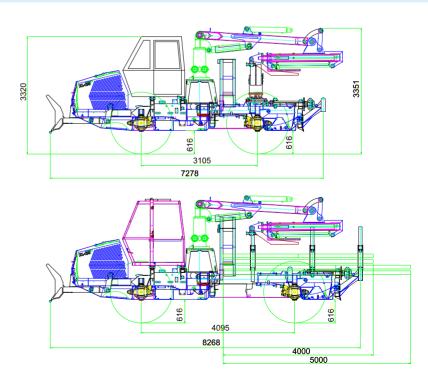

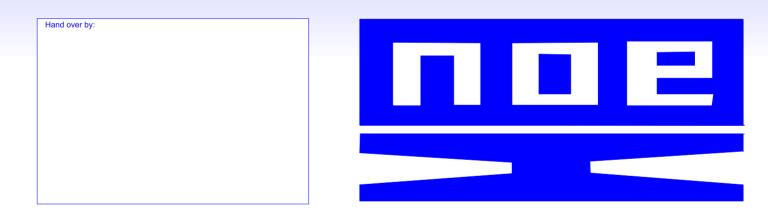

# 4-wheel Combinationmachine - all-wheel steering KL100 / KL100CL

Technical Data	KL100 / KL100CL		
Engine: Power: Consumption:	6-cylinder FPT diesel turbocharger direct injection 134 kW (182 hp) ca. 6 - 9 ltr.	Front shield: Rear shield:	lifting in standard customized shield on demand straight shield
Drive train:	hydrostatic Drive 2 Gear transfer box 1. Gear 0 - 13 km/h 2. Gear 0 - 35 km/h	Brakes:	Dual circuit braking system with wet multiple disc brakes in front and rear axle. Parking brakes as spring-applied multiple disc brakes in front and rear axle.
Axles:	NAF Planetary live axles 100% differential lock connect.	Elektric:	Voltage 24V
Load Sensing Hydraulic:	max. 209 ltr./min. by 320 bar	Tires:	28L-26 20PR (Standard) 23.1-26 16PR (Option)
Measure: Weight: without body Weight: Compl. body Turning radius in./ou	L/W/H - 7.278 / 2.740 / 3.558 mm Wheel base: 3.105 - 4.095 mm 3.105 mm (CL) ca. 12.400 kg ca. 14.800 kg (incl. crane) t. 7.000 / 12.000 mm	Filling quantities: Hydraulic oil:	Diesel 160 ltr. Hydraulic oil 170 ltr. Panolin HLP Synth. 46 incl. bypass filter
Following options are just examples and belongs to our standard models, individual changings are always possible			
Winch:	Ritter S66 D8 2 x 8 to. Rope capacity 2 x 120 m hydrostatic drive 2 speeds Overall tractive force till 16 to. (Opt.)	Clambank: Forwarder bodie: Load area:	NOE2.1 - 1.65 m2 separate pluggable 11.5 m3
Crane: Operating range: Swivel moment: Alternativ crane: Operating range:	NOE-KRZ7000, lifting torque 93 kNm 7.2 m 33.1 kNm Epsilon S120R72, lifting torque 114 kNm 7.2 - 8.0 m	Cabin: (see NF-series)	Spacious, low noise operator's cab, low vibration bearing. Security cabin with integrated roll-over protection meeting ROPS/FOPS standards. Pneumatically suspended comfort swivel seat with arm rest-mounted joysticks
