# 4-wheel Skidder - articulated NF140

NF140 - small, light, economical As a pure rope machine a economical alternative, with a constructed crane a powerful combination. As at all our forest machines the attributes powerfull, easy access to service, durable and innovativ go together.

The NF140, our entry-level model.

#### 4-wheel Skidder - articulated NF160 / NF160CL

NF160 - powerful and customized In cooperation with our customers many special solutions find place in the NF160. Already the standard option package is complete and leave nothing to be desired. Our first goal in the developing of a new machine is comfort and working ergonomie. If output to decent prices counts, there is no way through the NF160.

The NF160, a strong alternative.

### 4-wheel Skidder - articulated **NF210-4R**

NF210-4R - the power package Highest possible output comes together with highest possible profitability. The NF210-4R allied all attributes successful companies are known for. Intelligent clambank solutions developed in cooperation with the practicans of the forest industrie are our strong point. So you can benefit from these developements.

The NF210-4R - you will get a kick out of it.
