

WAKRA BS6E2

A very compact floor saw with electric engine, mounted on quick disconnection plates. The working feed is handled by pushing. Blade admission left and right side, up to max. 800mm! Blade lowering by crank mechanism. Thanks to water supply through cutting shaft and flanges, an optimal blade cooling is guaranteed. Depth adjustment indicator, crane suspension.

The nearly maintenance very strong Poly-V-strap drive, transfers the high torque of the electric engine direct to the diamond saw blade. The saw blade revolutions is around 1400 r.p.m. and is optimal to cut concrete with saw blade diameter between 600mm and 800mm.

WAKRA	BS6E2
<i>Electric engine</i>	7.5kW, 10PS / 400V, 16A
<i>Saw blade / cutting depth</i>	800mm / 325mm
<i>Weight</i>	113kg
