Distributor

General Breakers

Constantly Strives to maximize the satisfaction of our customers throughout the world by offering high-quality products at competitive prices along with prompt and professional after-sales service.

In addition, We are exerting our utmost efforts to develop and apply innovative technology to manufacture of GB Hydraulic Hammers and Insertion Tools.

Contents

- 04 Overview
- 08 Main body Structure
- 12 Standard Specification (Internal Valve Model) - 1T ~ 17T Class
- 16 Standard Specification (Internal Valve Model) - 20T ~ 80T Class
- 18 Standard Specification (External Valve Model) - 17T ~ 60T Class
- 22 Mainbody Structure (Full Hydraulic Model)
- 24 Standard Specification (Full Hydraulic Model)
- 28 GB Attachments
- 37 Worldwide Networks

GB Hydraulic Breaker has been considered as superb breaker which has durability and solidity on the basis of component consist of superb alloy steel and heat treatment. GB Breaker's inspection system has been progressing with high-priced inspection & test facility. All of the raw materials are examined by 2-D height gauge, endoscopy and micro-air plug gauge on purchase. And we completely make an inspection through breaker bench tester, tool present and micro-vickers hardness tester. Expressing strong confidence about high quality and inspection system, GB Breaker has proper warranty policy as well in case of any defects.

Quality

GB does not supply low quality products since we realise that the customers believe in GB's quality. All the main components are made by Korean materials and we produce all of them in house. Such qualified production process is able to manufacture top level breakers and it follows the international trend which prefers high quality of breakers. In connection with our quality, we always keep our motto "GB makes Good Breaker, Good Business with GB".

Guranteed Satisfaction!

VALVE ASS'Y

The cylindrical valve is built in the valve housing and it controls piston reciprocation.

INTERNAL VALVE MODEL

GBN10T, GBN20T, GBN30T, GBN40T, GBN45T, GBN60T, GBN70T, GBN100T, GBN140T, GBN170T, GBN210T, GBN220T, GBN300T, GBN350T, GBN400T, GBN450T, GBN520T, GBN620T, GBN800T

ACCUMULATOR ASS'Y

The accumulator compensates for pressure in the hydraulic circuit and prevents pulsation. It is not usually necessary to refill. Use N2-gas only.

VALVE ASS'Y

The cylindrical valve is built in the valve housing and it controls piston reciprocation.

EXTERNAL VALVE MODEL

GBN170E, GBN220E, GBN300E, GBN400E, GBN450E, GBN500E, GBN600E

Functions

Extended piston stroke

- Smoother operation
- Minimal repercussion on carrier

Improved properties (Piston)

- Improved emergency running properties
- Manufactured with high-quality nickel & vanadium alloy steel

GB Tool

- Exceptional performance and reliability
- Manufactured with high-quality alloy steel

Back Head

- Power accumulator

Lubrication adequate for entire shift

- Reduced wear and tear
- Consistent availability due to extended maintenance intervals

Cylinder & Valve

- Prevent scoring with precision finishing treatment

Tie Rod

- Dynamic screw design prevents damage

Accumulator (Some models applied)

- Reduces irregular pulse pressure on hydraulic circuit
- Improved striking power with supply of accumulated gas pressure

Since GB was founded in 1998, it has been grown as one of the most renowned manufacturer which specialized in supplying Hydraulic Breakers and Insertion Tools.

Since 2015, our factory has been newly constructed to have a more advanced production line and improve productivity. GB used to make customer satisfaction for 100% only, but 200% of customer satisfaction is currently available in GB.

*Proven Solutions for Demolition
/ Mining / Rock Breaking Jobs*

GB INDUSTRIES CO., LTD. constantly strives to maximize the satisfaction of our customers throughout the world by offering high-quality products at competitive prices along with prompt and professional after-sales service. In addition, we are expecting our utmost efforts to develop and apply innovative technology to manufacture of GB Hydraulic hammers and Insertion Tools.

Guranteed Satisfaction!

ACCUMULATOR ASS'Y

Membrane-type accumulators assist with power stroke and provide protection against hydraulic impact while the sealed nitrogen minimized and guarantees constant production.

PRESSURE REGULATOR

Ensures proper operating pressure at any flow rate within the specification range

CONTROL VALVE FOR CARRIER PROTECTION

It occurs frequently various changes of oil pressure inside of hammer during the operation. This valve can block any damage from the high impact energy causing of changes of oil pressure against to excavator.

PISTON

Kinetic energy of the piston is converted into hammering energy after hitting the tool.
The hammering energy transmitted to the tool breaks rocks.

OPTIMIZED PISTON DESIGN

To keep the most efficiency of power, the piston is in contact with the surface to the tool for energy transfer. Kinetic energy of the piston converted into hammering energy when the hits the tool and consequently rock is broken effectively.

EASY MAINTENANCE FOR LONG LIFE

This slip fit lower tool bushing is designed for easy field replacement and can be rotated 90 degrees for extended service life..

Efficiency

GB breakers have possessed high-tech Oil Flow System with continual development which makes it possible to maintain efficient impact force. By grafting our own technology, Operators can adjust the speed of each blow through particular application. It suggests they are able to conquer place of work with flexible and efficient response since operators can control the ration of shock wave against respective circumstance. Accordingly, we expect high quality work productivity of client as well as high quality of product.

Crusher

Features(Rotating Crushers)

- For powerful crushing performance
- Extended Durability with special steel
- Available in cutting steel reinforcing
- Innovation of opening and shutting speed
