**EMPTY CONTAINER HANDLER**

[WWW.HYSTER.COM](http://WWW.HYSTER.COM)

# RELIABILITY IN CONTAINER HANDLING

The Hyster® H180-230XD-EC/D series benefits from over 50 years of heritage in container handling and spreader design. These empty container handling machines offer fast handling, reliable proven components, and give an excellent return on your investment.

Hyster H180-230XD-EC/D empty container handlers can handle up to 23,000lbs capacity, allowing the trucks to easily pick two 40-foot reefer units at once. These trucks are designed to perform and last while handling the heaviest double container loads. With components designed for double handling, imagine what they can do in your single handling application.

You will appreciate the performance from the powerful and efficient Cummins QSB 6.7L engine and reliable ZF 5WG 211 transmission. The productivity benefits that come from Hyster single or double spreader give you more options than ever to move additional containers in less time. Features such as powered pile slope, automatic extend-retract of the spreader, auto throttle up and true inching allow for safe, accurate and smooth positioning of containers – even up to 9-high.

## PERFORMANCE IS KEY

### TIER 4 FINAL INTEGRATED POWERTRAIN

The Tier 4 Final Cummins QSB 6-cylinder diesel engine delivers 231 peak HP and 770 lb-ft of maximum torque, featuring cooled exhaust gas recirculation (EGR) technology with selective catalytic reduction (SCR) and an integrated diesel exhaust fluid (DEF) delivery system. A 2-stage diesel oxidation catalyst (DOC) is also included for particulate matter (PM) reduction.

Innovative selectable ECO performance modes, plus the 5-speed transmission and variable displacement pumps, offer excellent fuel economy and maximum productivity providing up to 15% fuel consumption reduction versus previous Tier 3 powered trucks. Hibernate idle can also save fuel by lowering engine speed when functions are not being used.

Automatic engine shutdown saves fuel by shutting down the engine if the driver leaves the seat or the engine idles for too long, after a pre-set (adjustable) time. On-demand hydraulics keep oil temperature lower to protect hydraulic components. Plus an optional hydraulic temperature protection system is available to derate the truck when the temperature threshold is reached.

- The drive train protects itself from excessive temperatures and pressures:
  - high coolant temperatures and low levels
  - high air intake temperatures
  - low engine oil pressure
  - high transmission oil temperatures and low pressure
- Variable geometry turbocharger, water cooled
- Rugged and capable ZF 5-speed 5WG 211 powershift transmission with proven field experience and reliability
- 24V electrical system with 120 amp alternator
- Automatic throttle-up on hoist and tilt enables engine to operate in most efficient rpm range

### TIER 3

**(Not available in US OR Canada)**

Cummins QSB 6-cylinder diesel engine delivers 231 peak HP and 700 lb-ft of maximum torque.

- ZF 5-Speed 5WG 211 powershift transmission
- Wastegate turbocharger, water cooled
- Automatic throttle-up
- On-demand hydraulic system
- 24V electrical system with 120 amp alternator

## THE RIGHT SPREADER FOR YOUR OPERATION

A comprehensive selection of single and double handling spreaders are available, featuring vertical twistlocks or hook & side clamps, to suit your specific application. These spreaders allow operations to handle most common types of containers including ISO, WTP and domestic containers.

**Container sensing system supports safe handling when transporting two containers.**

**Centralized greasing on the spreader reduces the number of grease points for easier maintenance.**

**Smart camera systems are available for additional operator support.**

**Ample sideshift allows operators to easily reposition offset loads and handle two reefers with the gen set on the same side.**

**The innovative spreader design enables the operator to see the twistlocks or hooks in every load position.**

**The optional auto extend-retract feature further assists operators by adjusting the spreader to a 20ft or 40ft container size at the touch of a button.**

## OPERATOR COMFORT

**Hyster Company is known for tough lift trucks, but we're also recognized for ergonomically advanced lift trucks. A spacious, comfortable operator environment and an operator interface with ergonomically designed controls helps elevate productivity while minimizing operator fatigue.**

The H180-230XD-EC/D series operator cab provides a spacious cockpit style cabin that keeps all truck information and controls within reach.

A variety of seat configurations are offered to suit operator preference including mechanical or air suspension, cloth or vinyl cover, lumbar support and ventilated or heated seats. The air conditioning system can be pre-set for automatic climate control and the high and rear louvers provide direct air flow toward the operator.

The ergonomically designed, seat-mounted control arm is fully adjustable and includes a wrist cushion and redesigned joystick to help reduce fatigue when operating the hydraulics. The intuitive joystick, integrated in the armrest, is designed for simplicity to provide easy, precise operation of the mast and spreader. The modular design of the control arm makes it possible to cover almost any possible truck configuration while being easily serviceable. The reliable CANBUS controls all main components.

The new 7" full color, touchscreen Integrated Performance Display shows all truck activity, allows for easy access to change or calibrate truck settings and is integrated with Hyster Tracker telemetry system.

*Optional secondary display available specifically for double handling.*

## VISIBILITY

Superb visibility through the mast allows easy positioning of containers at any height for more precise and efficient load handling. Optional raised cabin allows the operator to view and inspect the top of the container when positioned on a chassis.

The cab's structural design, curved tempered glass windshield and scratch resistant top glass creates optimum visibility for container stacking. Rearward visibility is outstanding with the cab location engineered to enable sweeping views over both the left and right shoulders.

A low-angle view looking up at the mast of a container handler as it lifts a white container. The mast has blue and yellow safety markings. In the foreground, the back of an operator's head and shoulders, wearing an orange safety vest, are visible. A dark blue text box is overlaid on the right side of the image.

Optimize the operator's vantage point with the optional automatic tip-up cab which can provide greater operator comfort when stacking containers above 4 high. Smart camera options and radar systems are also available to assist in visibility of key areas.

## > SIMPLIFIED SERVICEABILITY

Hyster® trucks have been designed with the service technician in mind. Easy access to the engine, hydraulics and other major components are enabled with a large hinged hood and lift off front covers. The tip back cabin provides ample service access to components located under the cabin.

Daily operator checks are completed with ease given the ready access to all checked items, filter indicators and sight glass on hydraulic oil tank. Preventative maintenance service interval is 500 hours. Hydraulic oil service interval can be extended to 10,000 hours using regular oil sampling. The integrated performance display offers high-level on-board diagnostics allowing for advanced and quick troubleshooting without having to connect a laptop to the truck.

### ADDITIONAL ENHANCEMENTS

- Broad, slip resistant running boards
- Optional utility toolbox and storage compartment
- The hydraulic oil tank features a sight glass and magnetic drain plugs for ease of maintenance
- Clean hydraulic hose and electrical harness routing and clamping

### AUTOMATIC GREASING

An optional automatic greasing system is available. Automatic greasing will significantly lower total cost of ownership by eliminating maintenance costs of manually greasing each component. By ensuring that greasing is completed, component service life can be extended.

## HYSTER TRACKER: WIRELESS ASSET MANAGEMENT

Take your fleet operation to the next level with wireless asset management from Hyster, standard on all Hyster Big Trucks. Hyster Tracker provides a scalable solution for fleets. From monitoring truck utilization to limiting operator access, Hyster Tracker allows you to track your fleet at your fingertips.

*Optional utility toolbox and storage compartment*

*Broad, slip resistant running boards*

## HEAVY DUTY PRODUCTIVITY

Hyster® H180-230XD-EC/D container handling trucks deliver high productivity with 4-mode average speeds\* of 107 ft/min (0.54 m/s), competitive in the industry at rated laden container handling capacities.

For optimal performance and durability, the variable lap mast features:

- significantly lower load roller forces
- less mast deflection
- higher torsional rigidity
- heavy duty 2 chain system with large diameter sheaves

This design enhances structural strength, contributing to lower costs and reducing downtime.

\*Average speed calculated using: laden lift speed (ft/min) at full rated capacity; unladen lift speed; laden lowering speed at full rated capacity; unladen lowering speed.

### TRAVEL SPEEDS

12.4 mph (20 km/h) - laden  
15.5 mph (25 km/h) - unladen

### LIFTING SPEEDS

91 ft/min (0.46 m/s) - laden  
122 ft/min (0.62 m/s) - unladen

### LOWERING SPEEDS

108 ft/min (0.55 m/s) - laden  
108 ft/min (0.55 m/s) - unladen

# INNOVATIVE TRUCKS ENGINEERED TO MEET THE MOST DEMANDING APPLICATIONS

For nearly 90 years, Hyster has conquered the world's most demanding applications. In the 1920s Hyster started as a manufacturer of lifting machines used in the rigorous logging industry of the United States' Pacific Northwest. A few years later the first forklift trucks were invented and the Hyster brand quickly gained its reputation for rugged quality. Hyster® lift trucks are designed to lower your cost of operations. Every truck we make — whether powered by gasoline, LPG, diesel, lead acid, CNG, lithium-ion or hydrogen fuel cells — is purpose-built to excel in its application. Every truck is also backed by an unmatched network of specialists.

**Dealer Network** — Our Dealer Network can offer the expertise of fleet managers, parts suppliers, capital procurement specialists and trainers. Carefully chosen dealers fully understand customer applications, assist in selecting the right lift truck and provide fast, reliable support.

**Hyster Fleet Services** — Even if you operate other brands, we can manage your maintenance and replacement plan. We can offer complete fleet analysis, fleet history summary and a cost-effective proposal for replacement and scheduled maintenance.

**Parts** — With genuine Hyster® replacement parts and UNISOURCE™ parts for all makes of lift trucks, we are your one-stop source for lift truck parts. In fact, we offer more than 7 million part number crosses for most brands of materials handling and other in-plant mobile equipment.

**Rental Products** — When leasing or buying isn't a practical option, we have access to more than 14,000 units for short- and long-term rental. We'll help you maintain output in a cost-effective manner.

**Hyster Capital** — We can arrange solutions for special financing requirements, taking the difficulties out of buying the equipment you need. Whether you purchase or lease a new or used lift truck, Hyster Capital offers superior service and competitive rates.

**Special Products Engineering Department (SPED)** — Different materials require different handling. That's why we can work with you to customize your lift trucks. From strobe lights to specially made forks, SPED has the tools to help you get the job done right.

**Operator Training** — Proper education in operating lift trucks minimizes the risk of injuries due to accidents while increasing productivity. Hyster offers OSHA-compliant materials that support the training of qualified operators.

**Service** — Your local Hyster® dealer offers a flexible, customized and comprehensive maintenance plan based on each lift truck's operation environment. Hyster service programs offer scheduled inspections and maintenance, along with quick, responsive service dispatched to your location.
