

HD

HEAVY DUTY LOADER BUCKET

FEATURES :

The Heavy duty buckets **HD** are available for work with loaders from 4,5 to 50 tons.

With its **very solid design**, the Heavy Duty bucket can be used in **extreme conditions**, in particular for highly abrasive applications such as **quarry loading**.

Similarly to the GP, it is manufactured in Hardox anti-abrasion steel for most of its parts: **blades, wear pads, counter-blade, skids and protective bands all made from Hardox**.

Its profile is adapted to the machine and materials you work with.

SECURITY

ADAPTED DEVICE

ROBUST CONSTRUCTION

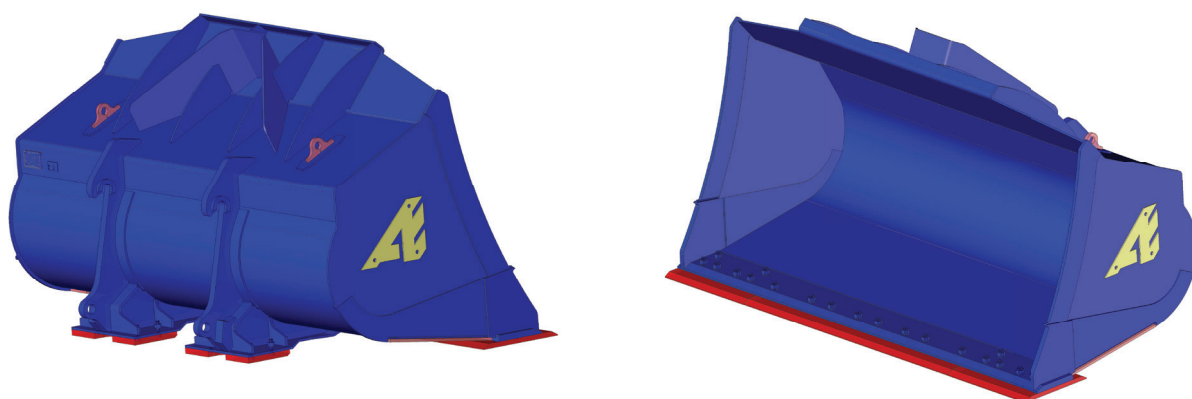

ADVANTAGES :

- Adaptable for loaders from 4,5 to 50 tons.
- Ideal for quarry loading.
- They have all been designed to provide fast and optimal filling for your machine and your application.
- They are also available in all sizes and for all carriers, both for original hitches and quick hitches.
- They are fitted with a reversible bolted counter-blade, as well as with bottom belts and skids on the sides.
- Possibility to adapt all standard teeth according to your request.

OPTIONS :

Twin metal welded plates
Band protections
Inter-tool shields
