

PC400HD-5

**HEAVY DUTY
HYDRAULIC EXCAVATOR**

Model shown may include optional equipment

KOMATSU: The Quality is Standard.

**FLYWHEEL HORSEPOWER: 276 HP @ 2000 RPM. BUCKET CAPACITY: .96-2.29 m³ (1.25-3.00 yd³).
OPERATING WEIGHT: 44560 kg (98,230 lb).**

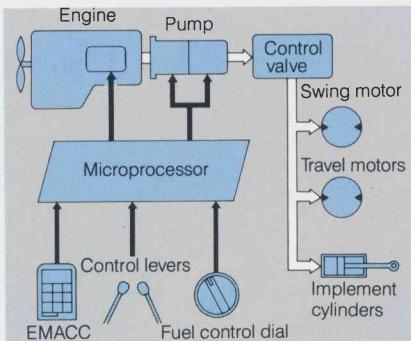

- Working mode selection system matches machine performance to actual job conditions
- OLSS system conserves fuel by preventing neutral, fine control and relief losses
- "Power max" button temporarily boosts digging forces for added power in tough situations
- Autodecelerator lowers engine speed whenever the work equipment and travel controls are in neutral for additional fuel savings
- Hi-Lo travel speed system automatically selects the correct travel speed depending on ground conditions and operator selection
- Merged circuits reduce cycle times
- Straight travel circuit assures straight travel, even during simultaneous operations
- Spacious, well-ventilated cab, excellent visibility and adjustable wrist controls add to the operator's comfort and productivity
- Adjustable electronic monitor and control console puts all control and monitoring functions at your fingertips
- Long track length and a wide variable track gauge provide for greater stability, increased lifting capacities and easy transport
- High ground clearance provides greater accessibility to forestry and other remote, rough ground applications
- Heavy-duty undercarriage means excellent durability even in the roughest applications

The New Frontier of Technology

UNEQUALLED PERFORMANCE AND FUEL ECONOMY

Working Mode Selection System

This system allows the operator to match machine performance and economy to the task at hand by selecting either the "Heavy Duty Operations," "General Operations," "Finishing Operations" or "Lifting Operations" mode. Simply select the appropriate working mode and the microcomputer does the rest.

Pump and Engine Mutual Control System

A microprocessor automatically varies engine speed and pump output for maximum fuel efficiency without sacrificing productivity.

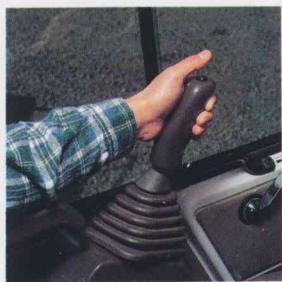

Electronic Monitor and Control Console (EMACC)

The EMACC puts all system controls and display functions within easy view and reach of the operator. The console can also be rotated through three positions to provide the best, glare-free viewing angle.

The EMACC Consists of:

- Working Modes
- Power Modes: Three modes (H, S and L) are automatically set in accordance with the working mode. Manual reset is also possible.
- Autodeceleration
- Monitor: constantly checks machine's condition
- Pre-start level checks
- Fuel gauge
- Coolant temperature gauge
- Caution items: coolant level and temperature, fuel level, oil pressure, and charge system
- Lo-Hi travel speed selector
- Swing lock indicator
- Wiper controls: intermittent or continuous
- Heater fan control

Power max. button

"Power Max" Button

Located on top of the left hand control lever, the "power max" button temporarily increases digging forces for added power in tough digging situations.

The New Frontier of Quality

Quality Improvements Include:

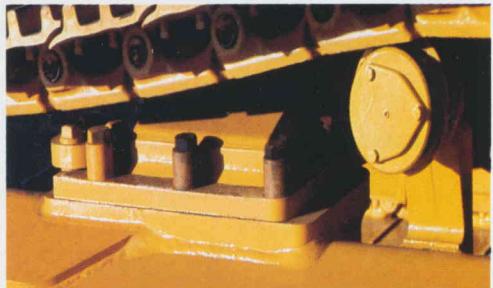

- Added filters and radiator dust-resistant screening to keep the hydraulic system clean and cool.
- Double lock electronic connectors and in-cab mounted electronic microprocessor provide increased reliability and protection from the elements.

Automatic Warm-Up System

Engine speed is automatically controlled by the microprocessor when coolant temperature is low for fast, fuel efficient and reliable engine warm-up.

Engine Overheat Prevention

Should the coolant temperature rise above desired levels, pump output and engine speed are reduced, preventing damage to the engine.

Variable Track Gauge

Variable Track Gauge

For shipping convenience, the gauge of the track and thus the overall width, can be decreased. This enhances the ability to transport the machine through tunnels, into remote mountain areas, and through many other confined areas.

Heavy Duty Undercarriage

Several modifications and enhancements have been made to the PC400LC-5 undercarriage. This has resulted in a stronger, more durable undercarriage ideally suited for heavy-duty applications.

Other Performance-Proven Features

- OLSS (Open-Center Load Sensing System) reduces hydraulic losses.
- Autodeceleration boosts fuel economy.
- Swing holding brake makes working on slopes much easier.
- Car-like operator's cab.
- X-leg frame for excellent stability.
- Merged circuits shorten cycle times.
- Straight travel circuits facilitate simultaneous work equipment/travel operations.

Adjustable wrist control lever

EASY AND COMFORTABLE OPERATION

Automatic Hi-Lo Travel Speed

Travel speed is automatically shifted to either "Hi" or "Lo," depending on ground conditions and operator selection.

Fuel Control Dial

The easy to use dial makes adjusting the engine speed quick and effortless.

Engine Key Stop

To stop the engine, simply turn the ignition key to off.

Spacious Cab

The roomy, efficient cab design has a large glass area for excellent visibility, as well as sliding front and side windows for cross ventilation.

Adjustable Wrist Control Levers

Unitized wrist control levers and arm rests can be adjusted through three work positions for maximum operator comfort. The proportional pressure wrist controls reduce operating effort while assuring precise work equipment operations.

Adjustable Operator's Seat

The fully adjustable suspension seat provides outstanding comfort.

Boom Lock Valve

The boom circuit is equipped with a boom holding valve to prevent hydraulic drift of the work equipment.

Swing Lock

The swing can be locked for transport simply by flicking a switch.

High Ground Clearance

Travel is easy, even on rough ground, due to the increased ground clearance.

SPECIFICATIONS

ENGINE

Komatsu SA6D125 4-cycle, water-cooled, and turbocharged diesel engine with 6 cylinders, 125 mm (4.92") bore x 150 mm (5.90") stroke and 4.89 ltr (673 in³) piston displacement. Flywheel horsepower **276 HP @ 2000 RPM**
The engine features direct injection for fuel economy, a mechanical all-speed governor, forced lubrication with a full flow filter, dry-type air cleaner with dust indicator and automatic dust evacuator, 24 V/7.5 kw starting system with 25A alternator, 2 x 12V/150 Ah batteries.

HYDRAULIC SYSTEM

Two variable capacity piston pumps and independent swing operation assure smooth compound movements of the work equipment. The Pump and Engine Mutual Control (PEMC) system controls the engine speed and pump output for maximum fuel efficiency and productivity. The Open-center Load Sensing System (OLSS) controls the pumps for efficient use of engine power, reduced hydraulic losses during operation, and low fuel consumption.

Two variable-capacity piston pumps power boom, arm, bucket, swing and travel circuits. One gear pump powers pilot control circuits.

Pump capacities (discharge flow @ 2000 engine RPM):

Piston 315 ltr (83 U.S. gal) min x 2
Gear 92 ltr (24 U.S. gal) min

Hydraulic motors:

Travel Two axial piston motors with parking brake
Swing One axial piston motor with swing holding brake

Relief valve settings:

Implement circuits 325 kg/cm² (4,620 psi)
Swing circuits 260 kg/cm² (3,700 psi)
Pilot circuits 30 kg/cm² (430 psi)
Travel circuits 325 kg/cm² (4,620 psi)

Control valves:

4-spool and 5-spool valves with a service valve

No. of cylinders — bore x stroke:

Boom 2-160 mm x 1570 mm (6.3" x 5'2")
Arm 1-185 mm x 1820 mm (7.3" x 6'0")
Bucket 1-160 mm x 1270 mm (6.3" x 4'2")

STEERING

Steering/traveling controls are activated with either hand levers or foot pedals. Pushing both levers (or pedals) moves machine forward. Pulling them back makes machine go into reverse. Setting one lever (or pedal) in neutral and the other in forward enables machine to make a pivot turn. Pushing one forward while pulling the other backward makes machine counterrotate on the spot.

DRIVES

Fully hydrostatic drive with each track powered by an axial piston two-speed motor. Power goes through a double-reduction planetary gear to the track. Automatic Hi-Lo travel.

Maximum drawbar pull 32500 Kg (71,650 lb)
Maximum travel speed, high 5.5 Km/h (3.4 MPH)
Maximum travel speed, low 3.1 Km/h (1.9 MPH)

BRAKES

Each travel motor is equipped with a brake valve that lessens shock when applied, and limits speed during descent. The wet, multiple-disc brakes actuate on the final-drive input shaft and automatically lock when the travel/steering levers and/or pedals are in neutral.

SWING SYSTEM

The swing system is powered by a hydraulic driven motor through spur and planetary gears. Single-row, shear type ball bearings with induction-hardened internal gears are built into the swing circle. Grease-bathed swing pinion, electric swing lock and swing holding brake are provided. Swing speed is proportional to swing control lever stroke.

Max. swing speed 9.3 RPM
Tail-swing radius 3430 mm (11'3")
Min. swing radius 4660 mm (15'3")
(work equipment, fully retracted)

UNDERCARRIAGE

X-leg type center frame is integrally welded with reinforced box-section track frames. Variable track gauge system allows reduction in track gauge for easy shipping without sacrificing operating stability. The design includes sealed tracks, lubricated rollers and idlers, hydraulic track adjusters with shock absorbing springs, and assembled track-type tractor shoes with triple grousers.

Shoe width 750 mm (29.5")
Grouser height 26 mm (1")
Number of shoes (each side) 52
Number of carrier rollers (each side) 2
Number of track rollers (each side) 10
Ground pressure 0.63 kg/cm² (8.96 psi)

SERVICE REFILL CAPACITIES

Fuel tank 550 ltr (145 U.S. gal)
Coolant 34 ltr (9 U.S. gal)
Engine 32 ltr (8 U.S. gal)
Final drive (each side) 11 ltr (3 U.S. gal)
Swing drive 22 ltr (6 U.S. gal)
Hydraulic oil 255 ltr (67 U.S. gal)

OPERATING WEIGHT

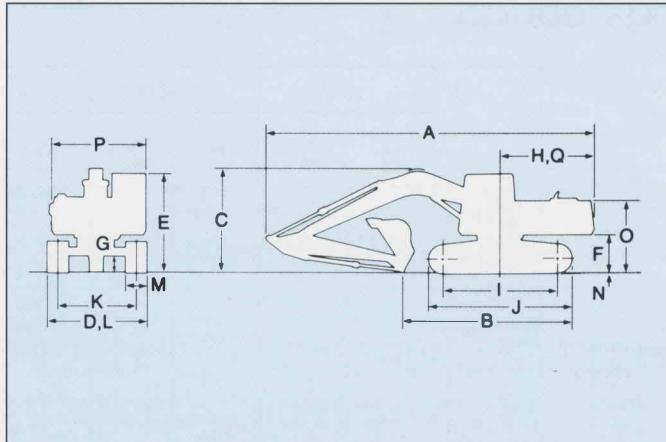

Including 7060 mm (23'2") one-piece boom, 3380 mm (11'1") arm, 1.82 m³ (2.38 yd³) ESCO STDP backhoe bucket, 750 mm (29.5") triple grouser shoes, operator, lubricant, coolant and full fuel tank 44560 kg (98,230 lb)

DIMENSIONS

NOTES

- Lifting capacities shown do not exceed 75% of minimum tipping loads of 87% of hydraulic capacities. Capacities marked with an asterisk (*) are limited by hydraulic capacities.
- Lifting capacities shown should not be exceeded. Weight of all lifting accessories must be considered part of the load.

- Lifting capacities assume the machine is standing level on a firm, uniform supporting surface. The user must make allowances for unfavorable job conditions such as soft or uneven ground or sudden stopping of loads.
- The least stable position is over the side.

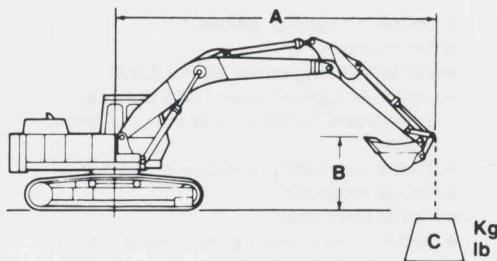

- The operator should be fully acquainted with the Komatsu Operation Manual before operating the machine.
- Capacities apply only to the machine as originally manufactured and normally equipped by Komatsu.
- Ratings are based on SAE Standard No. J1097.

PC400HD-5

Equipped with 750 mm (29.5") triple grouser shoes and a 1.82 m³ (2.38 yd³) 1350 kg (2,977 lb) ESCO STDP bucket with wear shrouds and teeth.

HYDRAULIC EXCAVATOR

Lifting Capacity

A — Reach from swing centerline

B — Bucket hook height

C — Lifting capacities

— Rating over front

— Rating over side or 360 degrees

— Rating at maximum reach

NOTES

1. Lifting capacities shown do not exceed 75% of minimum tipping loads of 87% of hydraulic capacities. Capacities marked with an asterisk (*) are limited by hydraulic capacities.

2. Lifting capacities shown should not be exceeded. Weight of all lifting accessories must be considered part of the load.

3. Lifting capacities assume the machine is standing level on a firm, uniform supporting surface. The user must make allowances for unfavorable job conditions such as soft or uneven ground or sudden stopping of loads.

4. The least stable position is over the side.

5. The operator should be fully acquainted with the Komatsu Operation Manual before operating the machine.

6. Capacities apply only to the machine as originally manufactured and normally equipped by Komatsu.

7. Ratings are based on SAE Standard No. J1097.

STANDARD EQUIPMENT

- Air cleaner, dry type with dust indicator and auto dust evacuator
- All-weather sound suppression steel cab with tinted safety glass windows, pull-up type front window with lock device, removable lower windshield, lattice guard, lockable door, floor mat, intermittent window wiper and washer, adjustable suspension seat with adjustable arm rests with control levers, seat belt, cigarette lighter, ashtray, heater and defroster, room light, glass protector brackets.
- Alternator 25 A
- Autodeceleration
- Automatic deaeration system for fuel line
- Automatic engine warm-up system
- Batteries 12 V/170 Ah x 2
- Boom holding valve
- Counterweight 8461 kg (18,654 lb)

- Double air cleaner element
- Electric horn
- Electric starting motor 24 V/7.5 kW
- Electronic Open-Center Load Sensing System and Pump Engine Mutual Control system
- Engine overheat prevention system
- Gauge protector
- Heater/Defroster
- Hydraulic lock type travel/parking brakes
- Hydraulic track adjusters
- In-line filter
- Instrument Panel – Electronic Monitor and Control Console Type:
Caution lights, display lights, gauges, pilot indicators, and switches. Electrically controlled engine throttle dial. Service meter, electric
- Light I-front (RH)

- Pins for boom foot and boom cylinder foot
- Power-max system
- Power mode selection system
- Proportional Pressure hydraulic control
- Radiator & oil cooler with dustproof screen
- Rearview mirror (RH)
- Revolving frame underguard
- Service valve
- Shoes 750 mm (29.5") triple-grouser
- Suction cooling fan
- Swing holding brake
- Track guiding guards (each side)
- Travel alarm
- Two speed travel
- Variable track gauge
- Vandalism protection locks
- Working mode selection system

ATTACHMENTS AND OPTIONAL EQUIPMENT

- Air conditioner
- Alternator 35A
- Counterweight removal device
- ESCO Thumb Clamp w/2,3, or 4 teeth
- Fuel supply pump
- Full roller guard
- Head guard
- Heavy duty boom and arm
- JRB Cam-Loc Quick Coupler
- LaBounty Concrete Pulverizers

- LaBounty Grapples
- LaBounty Mobile Shears
- Pierce Pacific Buckets for Super Long Front
– 1626 mm (64") 1.75 m³ (2.286 yd³)
– 762 mm (30") 0.67 m³ (0.875 yd³)
– 914 mm (36") 0.76 m³ (1.0 yd³)
– 1067 mm (42") 0.96 m³ (1.25 yd³)
- Pierce Pacific Super Long Front
– 16.8 m (55')
– 19.8 m (65')

- Rearview mirror (LH)
- Thumb Clamp instr. kit
- Track frame underguard
- Track roller guards (center)
- Warning lights for swing
- Young Scrap and Material Handler

SHOES

	Triple grouser		Semi-double grouser
Shoe width mm (in)	700 (27.6)	750 (29.5)	750 (29.5)
Machine ground pressure Kg/cm ² (psi)	0.67 (9.53)	0.63 (8.96)	0.62 (8.82)
Additional weight kg (lb)	– 91 (200)	0	– 2621 (5,780)

ARMS

Type	Length mm (ft.in)	Approx. Weight kg (lbs)
Extra Short	2388 (7'10")	1238 (2,730)
Short	2896 (9'6")	1288 (2,840)
Standard	3378 (11'1")	1275 (2,810)
Semi-long	3988 (13'1")	1594 (3,470)
Long	4800 (15'9")	1810 (3,990)
