

ASPHALT COMPACTORS GIVE SMOOTH, DENSE FINISHES

CR-SW Double Drum Rollers

- High Quality Honda and Kubota Engines
- High Frequency 4000 VPM on Both Drums
- Counter-rotating Eccentric Weights High Centrifugal Forces
- Articulated Power Steering Makes for Great Maneuverability
- Fold Down ROPS Standard on SW and TW Models

TW Combination Smooth Drum/Pneumatic Tire Rollers

- High Quality Kubota Engines
- High Frequency 4000 VPM Front Drum
- Wide Super Flat Rear Pneumatic Tires for Smooth Finish
- Articulated Power Steering Makes for Great Maneuverability
- Isolators are Covered Under 3-Year Power Train Warranty

PC Asphalt Plate Compactors

- High Quality Honda Gas Engines
- Abrasion-Resistant Alloy Steel Plates with Available PolyPads for Hardscaping
- Sprinkler System Perfect for Small Asphalt Jobs and Patchwork
- Easy to Own & Operate

SAKAI PC vibratory plate compactors offer compaction widths from 14-19.5 inches to handle numerous dirt and asphalt compaction jobs.

These plates feature water sprinkler systems for small asphalt jobs and patchwork.

The SAKAI CR and SW Series of High Frequency Double Drum Rollers is available in four different models that make quick work of asphalt compaction chores on projects like parking lots, bike paths, sports courts and mainline patchwork.

The SAKAI TW Combination Rollers feature a high frequency front compaction drum that gets density fast while the rear pneumatic tires provide excellent finishes.

ABOUT SAKAI

Sakai was founded in Japan in May 1918 for the manufacture and repair of diesel locomotives. Over time, those product lines evolved into what is now the premier manufacturer of self-propelled vibratory rollers in the world, shipping more machines than any other manufacturer. Sakai products are now used successfully in over 110 countries around the globe.

More recently, Sakai has begun to market their own line of light compaction products to complement their existing lines of heavy smooth and padfoot vibratory compactors and rollers. The new LITE LINE from Sakai includes the compact vibratory soil and asphalt rollers, plate tampers, rammers and walk-behind rollers shown in this brochure.

The uniqueness and innovation of Sakai that popularized their highly successful heavy line transcends to this new line-up of light compaction products. If you are a rental store pursuing a solid light compaction line or a contractor looking for value in high impact light products, you owe it to yourself and your company to contact Sakai today.

Heavy and Light Products for the North American market are now made available and are shipped from Sakai's manufacturing headquarters in Adairsville, Georgia. This strong commitment to the American market is additionally supported by the rapid dispatch of parts and service from this facility in suburban Atlanta.

For more information, please contact Sakai at
800-323-0535.

HS WALK-BEHINDS

- High Force Outputs and Superb Traction for Small to Medium Compaction Jobs
- Trench Compaction, Utility Backfill, Foundation and Repair Work
- Smooth or Padfoot Drum Configurations
- Tall Stack Keeps Exhaust Fumes Out of Trenches
- Strike-off Blade Available
- ROPS & Seat Belts Standard
- Isolators are Covered Under 3-Year Power Train Warranty

The SAKAI SV201-1 Series Vibratory Single Drum Compactors offers four different models to meet a variety of soil types and application requirements.

The SV201-1 Series offer a number of standard features found on SAKAI's larger single drum rollers such as a high compaction force, superior traction for trench work, unique hitch design, patented shock isolation system, superior serviceability, ROPS and seatbelts as well as a two brake, three-way failsafe braking system and a comfortable operating station.

- High Quality Honda Gas Engines
- Great for Compaction in Trenches, around Foundations and Utilities and for Sidewalks and Repair Work
- Abrasion-Resistant Alloy Steel Plates
- Carrier option available for PC600 & PC800 series
- Advanced Isolation System Reduces Vibration at the Handle
- Sprinkler System For Asphalt on PC Models
- Easy to Own & Operate

The SAKAI PC & PF series of vibratory plate compactors with compaction widths from 14-24 inches is designed to handle a wide range of small to medium-sized applications.

These plates feature Honda gas engines and other quality components, making them the reliable choice for busy contractors and rental house applications. A unique combination of high centrifugal forces, frequencies and working speeds increases productivity and profitability over a host of jobs. A water sprinkler system on PC models gives these plates the added flexibility of handling asphalt patchwork.

- Quality Honda Gas Engines and Other Components Lower Costs
- Superior Shock Isolation System Lowers Vibration Level at the Operator Handle
- Height-Adjustable Handles for Operator Convenience

The SAKAI RS Series of High Impact Rammers is available in three different models that make quick work of compaction chores on a host of tight quarter applications. Designed for harder hitting with a better balance, these machines have a great impact on your work schedule and your bottom line.

- Quality Honda Gas Engines and Other Components Lower Costs
- Steerable Front Drum Adds Maneuverability & Safety
- Short Side Frame Clearance for Compaction Close to Obstructions

The HS67ST is a unique, steerable walk-behind roller that simplifies compaction chores on numerous earthmoving projects. Offering high compaction clout, tight sideframe clearances and superb maneuverability, the HS can outperform any fixed drum machine. A sprinkler system makes this roller an excellent choice for smaller asphalt projects too!
