

SB tunnel version

Take these harsh conditons with our underground hydraulic breakers.

A solid choice

The SB tunnel version is perfectly adopted for scaling, wall & roof profiling and other tough underground jobs.

Energy recovery automatically utilizes the piston recoil energy to reduce vibration levels with the simultaneous increase of performance.

Maintenance-free high-pressure accumulator with a **patented diaphragm support** delivers consistent performance and high reliability.

Press-fit bushing locked by an additional pin to limit bushing bore wear.

Integrated nozzles for water spraying.

The integrated **pressure relief valve** protects against overloads.

Exchangeable restrictors to adopt performance to the job requirements.

The unique **Solid Body concept** eliminates common parts to enable high durability and a slim, compact, lightweight design.

An **exchangeable wear plate** increases Solid Body lifetime.

The **special tool** together with the **front shield & dust cover** minimizes dust intake.
