

AXIA EM

SBV12 -16P(I)(S) Series

PEDESTRIAN STACKER

1.2-1.6 TONNES | 24 VOLTS | AC POWER

AN INTUITIVE TRUCK... FOR SAFE OPERATIONS

AXiA EM

SBV12 -16P(I)(S) SERIES

Model	Load Capacity
SBV12P	1250 kg
SBV12P(I)	1250 kg
SBV16P	1600 kg
SBV16P(I)	1600 kg
SBV16P(S)	1600 kg

The versatile **AXiA EM** 1.2 and 1.6 tonne platform stacker range is the perfect choice for medium stack applications in narrow spaces.

The **AXiA EM** stacker is easy to drive thanks to its intuitive power steering, so the operator can work confidently and safely, ensuring smooth, fast and productive operations.

To prevent unauthorised use, it features a PIN code as standard. This means operator performance can be monitored.

AXiA EM has an optional Initial Lift allowing it to serve as a double pallet handler for maximum efficiency, as well as ease of use on ramps and uneven floors.

THE MITSUBISHI AXiA RANGE

HIGH-PERFORMANCE STACKERS WITH STAMINA AND VERSATILITY

Our compact, easy-to-use and highly versatile family of **AXiA** stackers give you the exceptional productivity you need to meet your goals... whatever the setting.

That's because **AXiA**'s been engineered to deliver big performance in small settings. And with capacities up to 1.6 tonnes and reaching heights up to 5.4 metres, it gives you the flexibility you need.

The all-rounder.

Ultimate versatility and unsurpassed stamina.

POPULAR FEATURES

POPULAR
FEATURE
#1

POWERFUL AC DRIVE MOTOR

This provides smooth, quiet, controlled operation, extended shift length and lower maintenance. It gives speeds up to 8.5 km/h, even when loaded.

POPULAR
FEATURE
#2

ERGONOMIC TILLER ARM

Designed to be used on either side of the truck during walk-beside mode, its large, clear buttons ensure that operators can focus on the task at hand.

POPULAR
FEATURE
#3

EASY LIFTING AND LOWERING CONTROLS

Clear, large buttons allow operators to lift and lower with ease - in safety. Best of all, they're suitable for hands of all sizes - even gloved ones.

POPULAR
FEATURE
#4

LI-ION BATTERY (OPTION)

This option allows for quick charging, while minimising maintenance - avoiding the need for costly extra batteries and time-consuming changeovers.

POPULAR
FEATURE
#5

EASY-ACCESS PLATFORM

Designed to maximise access, this cast-iron platform offers a low step height and outstanding cushioning, for operations that are easy, comfortable and safe.

POPULAR
FEATURE
#6

RAPID BATTERY ACCESS

together with battery rollers and battery discharge indicator, ensures quick and easy checks and maintenance.

POPULAR
FEATURE
#7

ELECTRICAL STEERING

This option allows for operations that are smooth, energy-efficient and shock-free, thanks to its full drive wheel capabilities (180°) when the tiller is at 90°.

FEATURES

DRIVE

Powerful AC drive motor

Excellent traction and ramp performance, smooth, quiet, controlled operation, extended shift length and lower maintenance requirements.

Initial Lift

Can be used as a double pallet handler. (Optional)

ELECTRICAL AND CONTROL SYSTEMS

Li-ion battery

Fast charging - removing the need for extra batteries. (Optional)

Power steering resistance

Natural driving experience to engage drivers and keep them alert.

Electronic power steering

Smooth, precise control with minimal effort and maximum comfort. (Optional)

Battery discharge indicator

Fitted as standard for battery protection and preventing deep discharge.

PIN-code access

Stops unauthorised truck use and keeps you aware of who's operating at all times.

Battery rollers

Changing batteries is quicker, easier and safer.

FORKS

Tapered forks

Access to pallets in racks or block stacks is easier, quicker and safer.

OPERATOR ENVIRONMENT AND CONTROLS

Easy-to-operate tiller arm

Its large buttons mean operators can focus on the task in hand and minimise mistakes.

Ultra-low step height

Operators stay more productive throughout shifts thanks to easy on/off access

Left-handed or right-handed controls

The tiller arm's versatile design allows for operation from either side.

Foldable side bars

These encourage efficient, safe operations by eliminating the need for operators to step off the platform. (Optional)

Dampened platform

Operators are protected from knocks and bumps, allowing them to stay in a more natural driving position for greater comfort throughout shifts.

Robust cast-iron platform

Resistant to impacts and knocks.

Keypad and clear display on tiller head

Activate the truck, change direction and review settings.

OTHER FEATURES

RapidAccess features

These allow quick and easy entry to all areas for checks and maintenance.

KEY TECHNOLOGIES

AC POWER

Our multi-functional centralised system for AC control uses advanced intelligence to get the best performance from operator and machine.

Offering high power for excellent traction and ramp performance, it provides smooth, quiet and controlled operation, extended shift lengths and reduced maintenance requirements.

Functions in detail:

- **latest MOSFET and heat dissipation technology** for maximum performance and energy efficiency

Standard on this range

LI-ION BATTERY TECHNOLOGY

Tried, tested and proven in the field, lead-acid batteries have been the long-standing top choice for companies employing electric lift trucks. However, with long charging times, demanding maintenance requirements, the need for extra batteries and high risk of operator misuse, it can be a challenge. Fortunately, there's a new battery system on the block: Li-ion from Mitsubishi Forklift Trucks.

Designed to meet your business' demands - including multi-shift (24/7) operations - without the need for spare batteries, our high-performance Li-ion battery system is up to 40 per cent more efficient than lead-acid counterparts. Plus, it's virtually error-proof, thanks to its ultra-low-maintenance design which prevent cell damage.

Top features of our Li-ion battery systems include:

- **Exceptional, zero-emissions efficiency** 40% more efficient than lead-acid batteries and free from gases.
- **Ultra-low maintenance design** demands just a full charge each week to activate cell balancing, as well as an annual CSV export/update.
- **No space required** With no need for charging areas, there's no cost for set up and you can keep your profitable space just that: profitable.
- **Quick charge capabilities** mean that just 15 minutes is all your battery needs to keep your truck going a few more hours. (It only takes 1 to 2 hours to fully charge a completely discharged battery.)
- **Higher sustained voltage** ensures more consistent lifting and driving performance, which is particularly noticeable towards the end of a shift.
- **TriCOM Technology** delivers exceptionally high system efficiency (up to 97%)

WHEN RELIABILITY IS EVERYTHING...

Like any product bearing the Mitsubishi name, our materials handling equipment benefits from the tremendous heritage, huge resources and cutting-edge technology of one of the world's largest corporations - Mitsubishi Heavy Industries Group.

Engineering spacecraft, jet planes, power plants and more, MHI specialises in those technologies where performance, dependability and superiority decide your success or failure...

So when we promise you quality, reliability and value for money, you know it's a guarantee we have the power to deliver.

That's why every model in our award-winning and comprehensive range of lift trucks and warehouse equipment is built to a high specification - to ensure it keeps working for you. Day after day. Year after year. Whatever the job. Whatever the conditions.

As your local authorised dealer, we are here to keep your trucks working - through our extensive experience, our technical excellence and our commitment to customer care.

We are your local experts, backed by efficient channels to the entire organisation of Mitsubishi Forklift Trucks.

No matter where you are, we are close by - with the capability to meet your needs.

Performance specifications may vary depending on standard manufacturing tolerances, vehicle condition, types of tyres, floor or surface conditions, applications or operating environment. Trucks may be shown with non-standard options. Specific performance requirements and locally available configurations should be discussed with your distributor. We follow a policy of continual product improvement. For this reason, some materials, options and specifications could change without notice.
